# BRAUN Portable Brushing Machine RUSTIKA® B 1800

BRAUN®

Clever Technology for Woodworking

## The handy power pack for great structures.

Exceptionally powerful and sturdy special portable machine with 1800 W motor and 130 mm working width. A reduction gear additionally increases the torque of the brushing axis. Thus large power reserves for rational structuring of even deep structures or on hardwood surfaces are at the disposal. Finely adjustable contact rollers at both ends of the machine enable an easy and even structuring of surfaces. The suitable position of the handles and the balanced weight distribution make the machine particularly handy. Segmented brushes allow structuring of profiles. Direct drive for a variable rpm regulation and the large selection of brushes for structuring and polishing result in a truly universal range of application. The machine is a professional solution for small production quantities or a supplement to our large stationary structuring machines.

### Professional Advice

Take the opportunity and ask for detailed professional advice. If requested, we'll be glad to advice you on the best solutions for your structuring, polishing, or sanding applications – free of charge and without commitment.
