WISE IS

**... strong** Its durability makes it a good choice for high traffic hotels, apartments, commercial and of course residential applications.

**... soft** It feels like real textile and provides a soft and comfortable feeling.

**... easy** It is easy to apply. Furthermore it is much easier to clean and maintain than carpets.

**... safe** It is flame resistant and it has much better anti-slip properties than a wooden or marble floor. It can be used unbacked where appropriate or backed for strength and better anti-slip characteristics, or treated for special applications. The backings can be used to create more durable, flame resistant fabrics with different degrees of breathability. The vinyl's DNA is antibacterial.

**... quiet** It is sound absorbing so you will enjoy the sound of silence at work or rest.

**... friendly** It keeps your place at the desired temperature for a longer time.

**... perfect** It can be used indoors or outdoors according to your desires.

**... fadeless** It is available in a wide range of colours. Moreover it is solution dyed, meaning that the colour is created in the solution before the fibres are extruded.

This provides the ultimate long lasting colour and unsurpassed colour life against fading.

**... tailored** You can make your own design and colours with a minimum order of 500 m².

The innovative vinyl floor material designed to make you feel comfortable.

The total production process uses low temperatures and nearly zero water. All excess material created during production can be recycled.

Because, we care about the environment as much as we care for your convenience.

**WISE is the ideal** woven vinyl fabric floor, that will cover your flooring needs for good! It is the best alternative to traditional carpets, wooden and marble floors, because it offers so much more.
