

PRODUCT RANGE & TECHNOLOGY

We are offering a full range of induction electric motors, from 0,04 kW up to 6000 kW, in standard and special executions. Our motors operate in almost all industrial segments like: pumps, fans, compressors, conveyors, mining, power plants and many other fields. We offer motors according to IEC standard in the efficiency classes: IE1, IE2, IE3, IE4 and motors according to Nema standard e.g. Nema Premium motors. Apart from standard motors, we offer motors for special applications in marine, oil, gas, energy, construction and many other industries. All main components of our motors are produced in our factories in order to guarantee the highest quality level. We attach particular importance to

the raw materials used for production, they are delivered only by qualified suppliers exclusively from the European Union. Our designs and solutions correspond to the customer requirements and international norms. All motors are manufactured according to Quality Management System consistent with ISO 9001 and Environmental Management System consistent with ISO 14001. Our motors are provided with CE mark and fulfill the EU Directives regarding the safety measures. The motors comply with almost all international standards: German standards DIN VDE, British standards BS, Italian standards CEI, Canadian standards CSA, American standards UL and NEMA and EU Standard ATEX.

GENERAL PURPOSE 3-PHASE Induction Motors

from 0,04kW to 2500kW

GENERAL PURPOSE 1-PHASE Induction Motors

from 0,04kW to 2,2kW

HIGH VOLTAGE Induction Motors

from 160kW to 6000kW

BRAKE MOTORS

from 0,04kW to 160kW

MOTORS WITH FOREIGN COOLING

from 0,06kW to 2500kW

INCREASED SAFETY MOTORS

from 0,06kW to 22kW

FLAME-PROOF MOTORS

from 0,75kW to 3200kW

NEMA MOTORS

from 1HP to 250HP
Series – SIE

Cantoni[®]
GROUP

DRIVING YOUR BUSINESS

CANTONI[®]
MOTOR

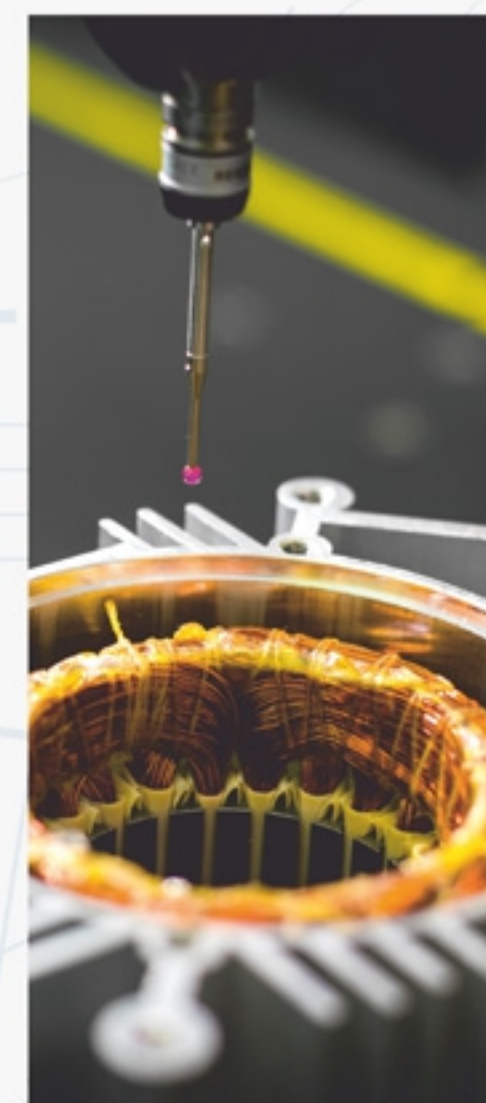

Since almost a century the Cantoni Group has been known worldwide as the leader in manufacturing and supplying electric motors, components and tools.

Thanks to the entrepreneurial commitment and great talent, the founder of the Group Prof. Giampiero Cantoni created diversified Group Enterprise that has gained outstanding success on the Domestic and International markets placing us among the most important European manufacturers.

As a family owned Group of companies we treasure old partnerships that have been maintained for many decades and constantly develop individual

approach to customer needs that has always been our main value on which we build our experience. Good business relationships with customers, high quality, research and innovation are the cornerstones of our philosophy and sale's strategy. Our Group comprises the following manufacturing plants: electric motors - BESEL, CELMA INDUKTA and EMIT, components - EMA-ELFA, tools - FANA, FENES, FORMIT and NARMOD, all located in Poland. The production plants have a rich experience and a long-standing industrial tradition in the design and production. All our motors guarantee high performance and big reliability even in the most demanding applications.

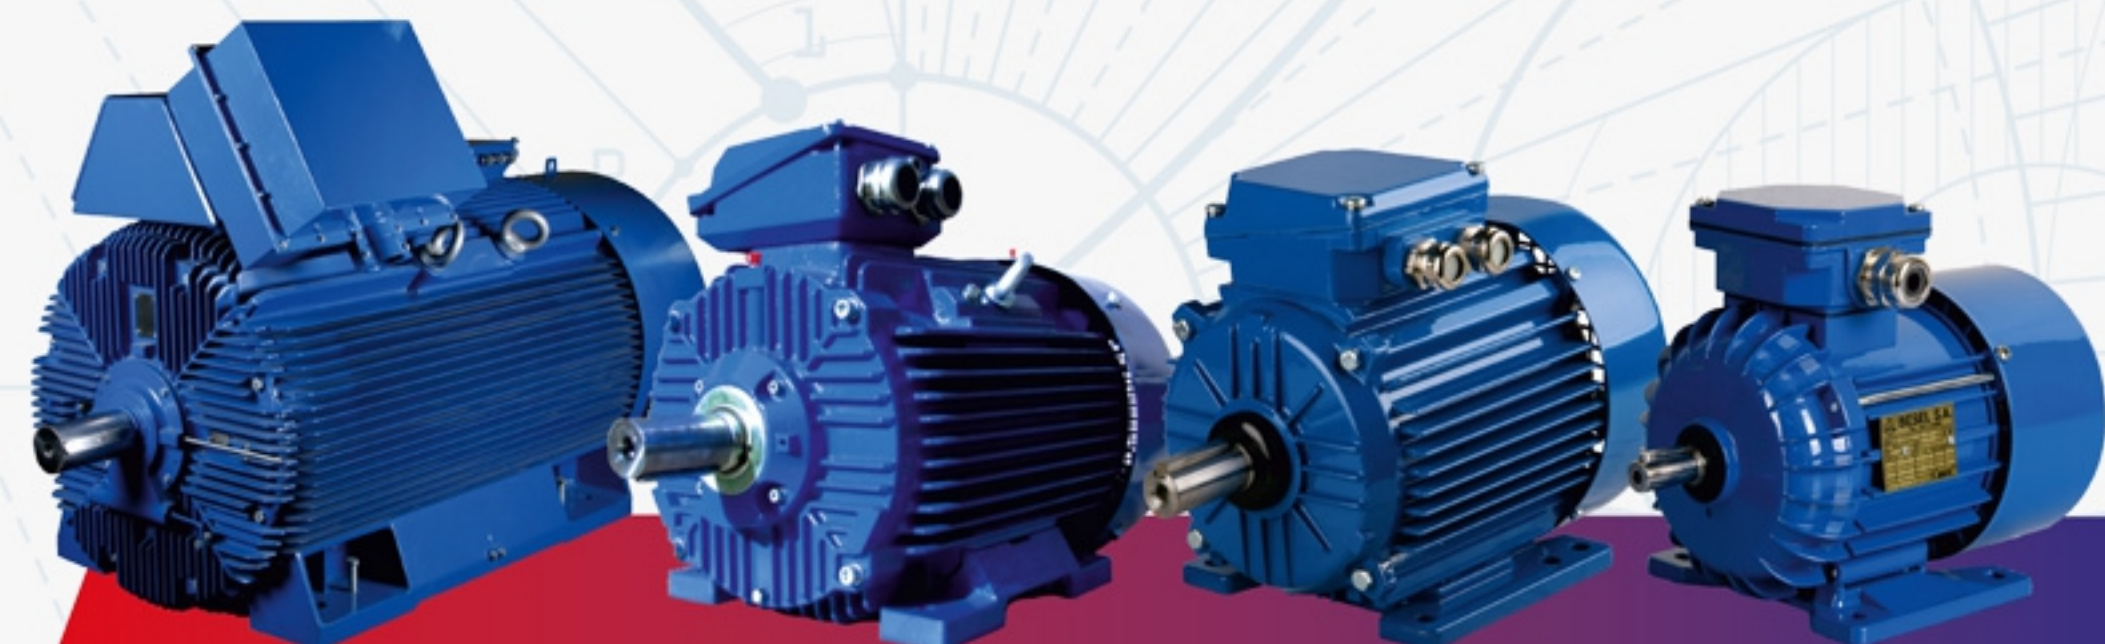

Cantoni Motor S.A. coordinates the sales and purchasing for the whole Group. International Sales Office operates from the headquarters in Cieszyn, Poland.

We provide complete customer service, from offer submission until the shipment, after-sale service and full technical support.

Thanks to the flexible organization our technical and sales team is able to face all requirements of modern markets immediately and pay the maximum attention to the realization of the most challenging projects.

We constantly develop our presence on new markets and we are open for cooperation. You are welcome to become our partner or distributor, please contact us by e-mail or phone.

Our manufacturing plants

Proud of our tradition and experience we focus on innovations and high quality motors for your business
