

PRODUCT RANGE

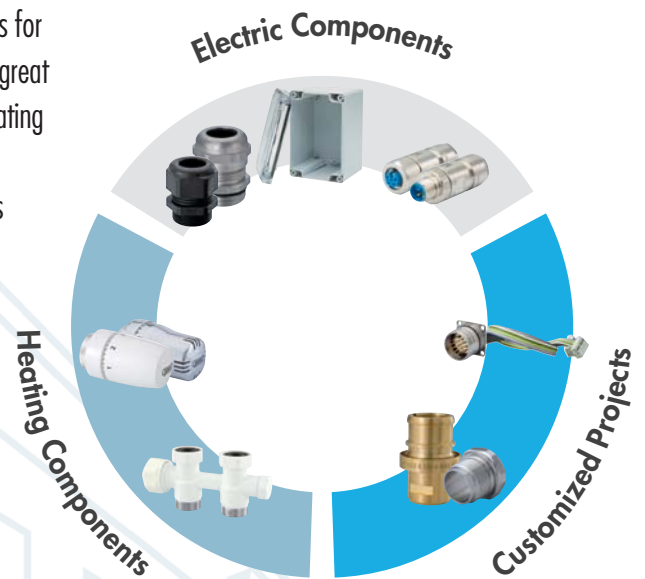

CERTAINLY THE RIGHT CONNECTION

HUMMEL AG

The HUMMEL AG is a renowned manufacturer of components for the areas of electrical engineering and heating systems. The medium-sized family-run company stands for quality, precision, reliability and a well-developed sense of self-confidence. The great vertical integration with development, design, tool making, production, electroplating and installation from a single source provides the best requirements for a high customer orientation when implementing individual solutions. The company has an international orientation and has 11 independent foreign subsidiaries. In addition there is a worldwide network of partners. This permits to serve customers all over the world to be supplied in a quick and flexible manner with the solutions and products of the HUMMEL AG. A wide range of products, outstanding knowledge of the sector and plenty of experience characterise the family-run company.

The Product Range

- // electrotechnical components
- // customised solutions
- // heating accessories

Electrotechnical components

Vast product portfolio for industrial application

HUMMEL offers a vast portfolio of electrotechnical components for industrial applications. Special features are the innovative technology and the use of high-quality materials. HUMMEL products therefore have all required certificates and meet highest protection classes for use also in rough industrial environments.

Circular Connectors

- // signal and power connectors
- // industrial Ethernet solutions
- // M 8 to M 40
- // customisable and injection-molded versions

Cable Glands

- // brass and stainless steel glands
- // plastic glands
- // hazardous areas
- // hygienic design

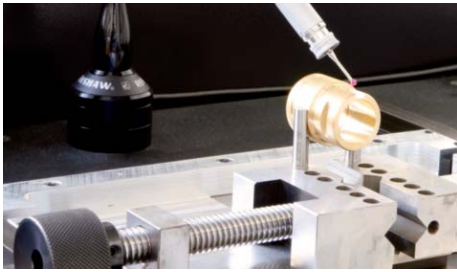

Cable Protection

- // Polyamide cable conduit
- // galvanised steel cable conduits
- // multi-layer conduits
- // plastic and metal fittings

Industrial Enclosures

- // plastic housings
- // steel and stainless steel enclosures
- // aluminium enclosures
- // machined enclosures

Customised Solutions

Broad range of system solutions thanks to great production variety

As renowned system partner, HUMMEL supports its customers in the development and production of individual solutions. This speeds up processes and production processes are streamlined. Decades of experience produced a wealth of know-how. This resulted in the development of numerous areas of competence in the company.

Individual system solutions

- // system partner for the development and production
- // cable design according to customer requirements
- // special metal and plastic parts
- // machined housings fitted according to customer specifications
- // customised cable sets

Heating Accessories

Innovative solutions for the plumbing and heating industry

For decades, HUMMEL has been a constant in the plumbing and heating industry. The products are widely known as problem solvers for all conceivable installation situations on the construction site. Heating fitters appreciate the easy installation, the high quality and the innovative technology. The HUMMEL problem solvers are almost indispensable for fitters when renovating heating systems.

Problem Solvers

- // steel pipe adapter
- // telescopic connections
- // flexible radiator connections
- // elbows

Boiler Connection / Underfloor Heating

- // pump assemblies
- // heating manifolds
- // distributors, controllers, accessories
- // hydraulic separator

Fittings

- // ventilation / emptying
- // terminal blocks
- // thermostatic valves
- // design engineering
- // clamp terminals

OEM

- // customised solutions
for the plumbing, heating and air-conditioning industry

PRODUCT RANGE ELECTRICAL ENGINEERING

Cable Glands

plastic, brass and stainless steel glands
EMC connections, Ex e-, Ex d-, Ex ta glands

Circular Connectors

M 8 to M 40, INOX, TWILOCK, Industrial Ethernet,
power, signal, hybrid connectors, injection-molded solutions

Industrial Enclosures

Housings made from PC, polyester, aluminium and stainless steel,
customised all-in systems, housing configurator Cable Protection

Cable Protection

Conduit systems, conduit fittings, angle systems,
combined fittings, accessories

Cable Manufacture

Injection-molded signal and power connectors,
servo cable, cable sets
