

## Hydraulic Power Units

As a manufacturer of hydraulic power units, Hunger Maschinen GmbH supplies complete system solutions for all applications in the industrial hydraulic sector and lubrication system sector. The range includes pressure ranges between 10 and 700 bar and delivery volumes of up to 10,000 liters. The systems can be equipped for the media commonly used in hydraulics. Our hydraulic systems have proved their worth above all in hydraulic steel construction, in the iron and steel industry, in the aluminium industry and in open-cast mining.

We project and manufacture customer-specific hydraulic systems in any size and for a wide range of applications.

- Aluminium industry
- hydraulic steelwork
- metallurgical engineering
- offshore
- Coal and strip mining industry
- shipbuilding
- test bench technology
- Lubrication systems for surface mining and cement industry
- press manufacture
- machine tool building
- Special purpose technology
