

INDUSTRY 4.0 IN PRACTICE

The Smart Electronic Factory e.V. has developed an information and demonstration platform for the Industry 4.0. This evaluation environment is part of a real electronics factory. The association consists of leading plant engineering firms, automation specialists, software and hardware providers, consulting firms and university institutions.

OBJECTIVES

The initiative interdisciplinary conceives, tests and validates Industry 4.0 solutions within a real manufacturing environment with focus on the requirements of small and medium-sized enterprises. The constant developments, participations in research projects and the active idea exchange between all members have a supreme objective: putting connected and optimized production processes in the sense of Industry 4.0 into practice in order to equip enterprises for the digital future.

INTELLIGENT CONNECTIVITY FOR INDUSTRY 4.0

INTELLIGENT CONNECTIVITY FOR INDUSTRY 4.0

INTELLIGENT VERNETZT FÜR DIE INDUSTRIE 4.0

- Die SEF ist eine Industrie 4.0-Evaluierungsumgebung in einer realen Elektronikfabrik
- Industrie 4.0-Lösungen werden in einer realen Produktionsumgebung kreiert, getestet und validiert
- Ziel: Produktionsprozesse leistungsfähiger gestalten und Aussagen über prozessspezifische Problemstellungen erhalten
- Beispielplattform für alle diskreten Fertiger
- Know-how-Transfer über Ideen, Lösungsansätze und real erzielte Ergebnisse

INTELLIGENT CONNECTIVITY FOR INDUSTRY 4.0

- SEF is an Industry 4.0 evaluation environment in a real electronics factory
- Industry 4.0 solutions are designed, tested and validated in a real production environment
- Goal: optimize production processes and gain experience concerning process specific problems
- Platform for all discrete manufacturers
- Know-how transfer regarding ideas, solutions and achieved results
