The perfect Partner exists.

A company able to innovate, evolve and believe in the future and in progress.

Specialised in the production of electrical cabinets for energy distribution, automation and rack systems, Lafer is the perfect blend between innovation and flexibility.

It works with customers in Italy and abroad on the strength of a cutting-edge, automated production system. **All stages of processing are carried out internally which allow us** to offer a full management of each order.

Lafer ensures certain delivery times that are always associated with a complete service meeting the customer's requirements but, above all, Lafer manufactures quality products reflecting 100% its way of being: advanced, customized systems that perfectly meet the requirements of the installer, the customer and the end user.

Quick, intuitive and advanced.  
Imagine the cabinet, with FAST-ONE you realize it.

The very first free, universal and multi-brand configurator enabling users to design the switchboard layout.

FAST-ONE™ solution changes your way of working cleverly. The easy, quick, efficient configurator accelerates the production phases and optimizes the verifications eliminating automatically the errors. It reduces costs and time, it makes the design phase more fluid, it simplifies the manufacturing, the assembly and the installation of your projects. Today you can order the products in ready delivery. Universal and modular, it is the maximum freedom without useless restrictions.

**FAST-ONE™. Studied and developed with you and for you.**
