Rotary Gear Limit Switches for Yaw- and Pitch Control

Rotary gear limit switches with up to 12 cam switches and 2 different ratios

Rotary gear limit switch with integrated incremental or absolute encoder and circuit board

Rotary gear limit switch with absolute SSI, CAN or Profibus encoder on extended shaft

Rotary gear limit switch with integrated potentiometer

Rotary gear limit switch with incremental or absolute encoder for pitch control

Rotary gear limit switch with encoder for pitch and yaw control with anti backlash pinion

Encoders for pitch and generator control

Incremental and absolute hollow shaft encoders for generator control

Incremental and absolute encoders with SSI or fieldbus outputs for heavy duty up to -40°C

Absolute multiturn encoders with mechanical gear – no battery

Magnetic incremental and absolute single- and multiturn encoders with RS422, SSI, CANopen, RS485, SAEJ1959 outputs for harsh conditions
