GPR-1800/2800 AIS/IS Intrinsically Safe ATEX Analyzers

GPR-1800 ATEX Intrinsically Safe Oxygen Analyzer from AII

The GPR-1800 measures ppm levels of oxygen and offers optional Modbus RTU Communication and modular sampling system. It is available with alarm relays (GPR-1800 AIS) or without (GPR-1800 IS).

GPR-2800 ATEX Intrinsically Safe Oxygen Analyzer from AII

The GPR-2800 measures percent oxygen and offers optional Modbus RTU Communication and modular sampling system. As with the GPR-1800, it is available with or without alarm relays.

Highlights

- 2 sensor options available
- 12 to 28 V DC power or mains power (AIS only)
- 2 x field selectable concentration alarms
- Modbus communication (AIS only)
- Standard sample includes sample/span valve, moisture filter, flow meters
- Optional fully automated sample system

Applications

- Oxygen analysis in inert, hydrocarbon, helium, hydrogen, mixed and acid (CO₂) gas streams
- Landfill gas percent level O₂ measurement to monitor the quality of the gas as it is used to power incinerators and boilers
- Processing of 'cleaned' natural gas
