
Robus is the new range of iron helical gearboxes produced by motive, with capacity up to 37Hp. It includes a long list of motivating values:

RobusT

- Cast iron Body, Base and the Flange
- Top cover in light aluminium.

Versatile:

- Modular design with detachable output flange and foot base
- Various detachable foot bases in solid cast iron make Robus interchangeable with any other gearbox brand

Flexible:

- IEC flange and hollow shaft.
- Unique construction of Robus makes it possible to mount any size in any position.

Reliable:

- high strength case hardened steel gears.
- All gears are profile ground
- high centers distance of the last stage gear and pinion
- Dual bearing support on the input shaft
- Intermediate shaft is rigidly supported by 3 bearings
