

Applications

Prevost offers many products for fluid applications in every Industry, using pneumatic and hydraulic energies:

- **Automotive:** auto manufacturing, auto repair shops and quick service facilities, auto body paint shops...
- **Plastics industry**
- **Wood industry:** sawmills, woodworking...
- **Textile:** weaving mills, clothing factories...
- **Food industry:** food processing industry, abattoirs and meat packing plants, dairy factories and cheese factories...

Services

Prevost is committed to providing products and services of the highest quality and reliability under the best conditions.

Ringmain drawing

Prevost's in-house team analyses your needs, provides you with advice and calculates the cost of your ringmain:

- A general diagram of your compressed air ring main
- A detailed drawing
- A complete quote

Product training

Prevost offers a wide variety of training in understanding and using compressed air. These courses are aimed at professionals who wish to make energy efficiency part of their production or marketing strategy. A number of courses can be held in our specially dedicated and equipped training room or at your premises.

A responsive sales department at your service

Efficient logistics

A company monitoring market trends and adapting to the consumer's expectations

CONNECTED TO INNOVATION

COMPREHENSIVE AND RELIABLE SOLUTIONS

Since its inception in 1978, Prevost has been providing its customers with a **complete range of reliable and complementary products** designed for **compressed air networks and fluid distribution systems**.

Innovation and quality are two essential drivers of Prevost's growth, enabling the company to adapt to market changes and meet the expectations of its customers. Prevost regularly releases new, state-of-the-art products that are thoroughly tested and inspected to ensure their **conformity with the latest standards**.

Prevost's dynamic and responsive organisation guarantees top service, quick delivery and **consistent technical and sales support**.

TREATMENT

CONNECTION

DISTRIBUTION

Air treatment units **ALTO**

ALTO MAX

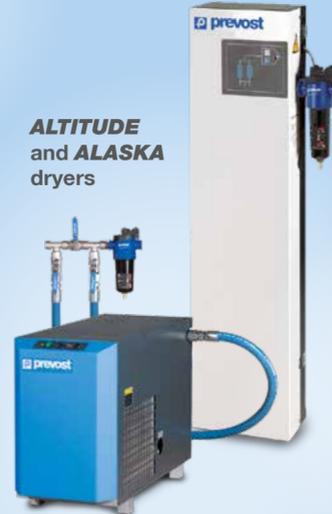

Gauges

Sub-micron filter **MICRO AIR**

ALTITUDE and ALASKA dryers

Drains, separators and condensate processing units

Safety quick couplings **prevoS1**

prevoS1 couplings metal range passage 11

Standard quick couplings **PROLAC**

ELS couplings for water circuits

CPI quick couplings for cooling circuits (moulds)

PREOL quick couplings for fluids

Hose reels

Hoses for compressed air and other fluids

Hose extensions

Spirals

Ear and screw clamps

AMPS concept in aluminium profiles

Aluminium piping range for compressed air network **ALR** and **PPS**

Composite alloy piping : **PVR** range

Connectors and connection accessories

Valves

Hydraulic quick couplings

ISOFLAM safety couplings for welding torches

Breathable air couplings **BAC 07**

Compression and olive fittings

Push-in fittings **CONEX:** polymer, metal, stainless ranges

Washing guns, paint spray guns

Balancers, energy boxes and suspension arms

Blow guns **27102**

Blow guns **prevoS1**
