

Fig. 117.1

Quadritalia produces various series of consoles: **LC, BLC, LMC, LAS, BLD and LAR**. Each of these series has a special composition to satisfy any requirement for customisation on the part of customers. All consoles are made from press-bent sheet metal to guarantee the robustness of the structure, and are assembled in respect of IP 55 protection. They may be equipped with electromechanical plates in galvanised sheet metal with a thickness of 2 or 2.5 mm; the depth of installation can also be varied in some models.

Special boring may be performed on the structure, doors, console and rear panels, on request.
