

**TRAFO**ELETTRO  
endless transformation

endless transformation

A young boy in a striped shirt holds a small tree sapling. An adult in a plaid shirt and jeans crouches beside him, with hands on the ground near the base of the sapling. The scene is outdoors in a grassy field with trees in the background. A yellow geometric shape is overlaid on the right side of the image.

# SINCE 1969 TRANSFORMING THE WORLD

---

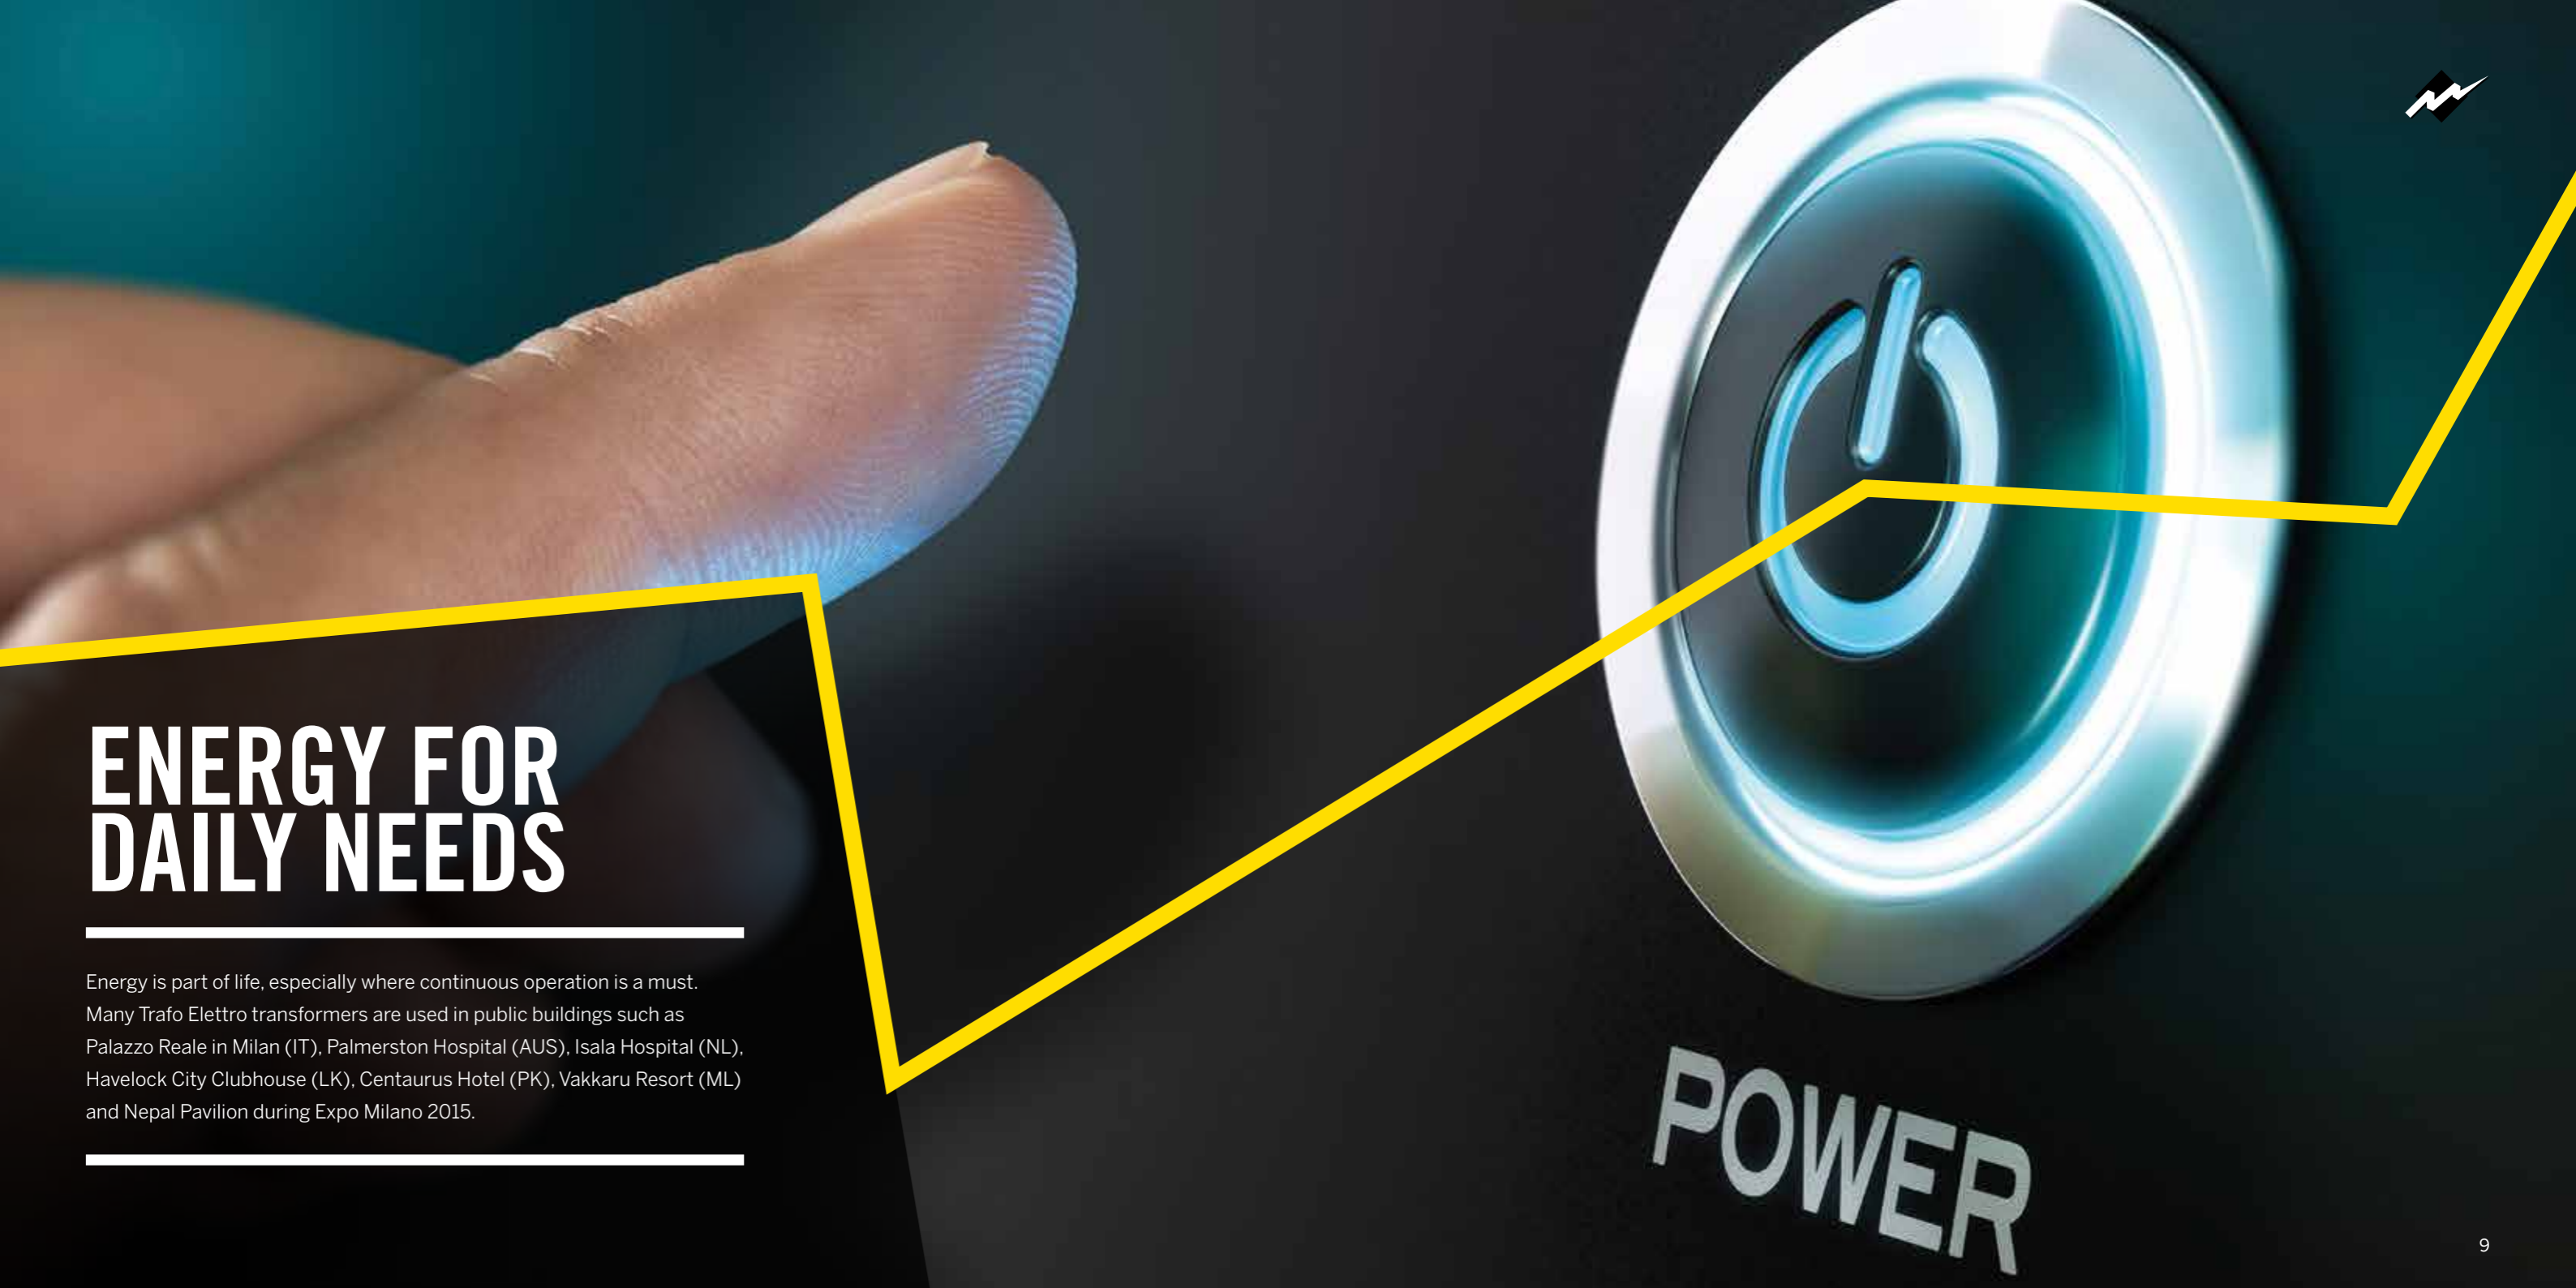

Founded in a small lab, now competing on the global stage. Proud of experience, expertise and commitment of professionals working in the company, Trafo Elettro invests every day to improve customer service, products quality and environmental impact reduction.

---

# WORLDWIDE ENERGY

30 000 units running in more than 90 countries make Trafo Elettro an established and recognized brand all over the world. This aim has been achieved thanks to a strong commercial partnership that can give full service with clear and comprehensive responses and rapid solutions for any technical/commercial question.

# ENERGY FOR DAILY NEEDS

---

Energy is part of life, especially where continuous operation is a must. Many Trafo Elettro transformers are used in public buildings such as Palazzo Reale in Milan (IT), Palmerston Hospital (AUS), Isala Hospital (NL), Havelock City Clubhouse (LK), Centaurus Hotel (PK), Vakkaru Resort (ML) and Nepal Pavilion during Expo Milano 2015.

---

POWER

# ENERGY FOR (E)MOTIONS

---

People travel on time everyday thanks to Trafo Eletto transformers. Many transformers have been installed inside airports such as Schiphol Airport (NL), Astana (KZ) and Tocumen (PA). Subways like Lima (PE) and railways such as Gaziantep (TR), Caracas (VE), Milano, Adria and High Speed Line Turin-Naples in Italy.

---

# ENERGY FOR HEAVY CONDITIONS

---

Designed to be installed in the most critical applications.

A lot of companies have chosen Trafo Eletto as a safe and reliable partner, like mines in Chile, paper mills in Italy, oil platforms in the North Sea, oil treatment factories in Russia, various salinization plant in Qatar, Davis Station - Antarctic permanent base, cement factories in Sri Lanka and in the Ivory Coast.

---

# CLEAN ACTIONS CLEAN ENERGY CLEAN AIR

---

Trafo Elettro has always been guided by the will to find solutions for energy saving and CO<sub>2</sub> emission reduction. Its transformers have been applied in many geothermal plants in Kenya, solar plants in Italy, Europe, South Africa, Australia, America and hydroelectric power plants in South America, Europe and Africa.

---

# IDEAS MEET TECHNOLOGY

---

Flexibility of Trafo Elettro's team gives the possibility to transform ideas into reality. Excellent quality/price ratio is one of the brand's key points. Trafo Elettro does not wish to be a simple good supplier, but a Safe and Reliable Partner. The motto of the company is Helpfulness, which it is translated into responsiveness and ability to customize the product. ISO 9001 quality standard and environmental management system ISO 14001 standards optimize internal process.

---

# CAST RESIN TRANSFORMERS

---

Trafo Elettro was one of the first companies to produce cast resin transformers in 1983.

This product has been tested at CESI laboratories for compliance with E3 environmental class, C2 climatic class, F1 fire behavior class, as prescribed by IEC standards.

With more than 20 000 units installed all over the world, cast resin transformers are appreciated for their self-extinguishing characteristic in case of fire.

Range up to 30MVA and insulation class up to 52kV, BIL 250kV.

---

# OIL IMMERSED TRANSFORMERS

---

Particularly appreciated for outdoor installation. Trafo Eletto counts more than 10 000 oil immersed transformers installed worldwide. Specifically customized to suit the customer needs they can be designed with eco-friendly products. Oil immersed transformers are available in version with conservator or hermetically sealed. Range up to 50MVA and insulation class up to 145kV, BIL 650kV.

---

# AMORPHOUS TRANSFORMERS

---

With researches and innovation, Trafo Eletto has developed a new product: The Amorphous Transformer. More than 500 units, between oil immersed and cast resin type installed, are a proof that this product is an interesting option for those companies that pay special attention to electricity costs and CO<sub>2</sub> emissions.

Range up to 5MVA and insulation class up to 52kV, BIL 250kV.

---

# SPECIAL UNITS

---

The experience of Trafo Elettro's team and the best technology used in every transformer allow to offer a wide range of special products.

- Dry type transformers
  - Reactors
  - Autotransformers
  - Earthing transformers
  - Furnace transformers
  - Converter transformers (6-12-18-24 Pulse)
  - Excitation transformers
  - Rectifiers transformers
