

Company Profile

founding year: 1945 in Frankenberg/ Saxony
1958 Reconstruction in Lohr am Main

Head office at Lohr am Main - Germany

The Hunger Hydraulics Group, an internationally active group of companies in the metal and capital goods industries, is one of the leading suppliers in the hydraulics sector. For more than 70 years, the company has been dedicated to solving problems in the fields of hydraulics and automotive with intensive consulting. In line with growing customer needs, the group has diversified its product range and is currently represented by 15 companies in seven countries.

Product range

The interaction of experience, product, production and application know-how, the use of state-of-the-art technologies and the linking of hydraulic components to customer-specific modules and systems form the basis for meeting customer requirements.

- Hydraulic cylinders in standard and special design up to 2500 mm diameter and 30 m length
- telescopic cylinder
- Precision steel tubes up to 500 mm diameter and 12 m length
- Pistons and piston rods
- hard chromium plating
- Seals and bearing elements
- Hydraulic components, such as hydraulic units, rotary distributors, hydraulic valves,
- Rotary actuators, spherical plain bearings and rod ends
- Repair and service for hydraulic cylinders
- Honing stones and tools

Fields of application

- hydraulic steelwork
- bridge equipment
- press construction
- offshore technology
- fire extinguishing systems
- open-cast mining equipment
- construction equipment
- machine tool building
- Steel and rolling mills
- aluminium casting plants
- test bench technology
- mechanical engineering
- mobile hydraulics
- plant engineering

Through the cooperation of the specialized group companies, the customer can obtain complete systems tailored to his individual requirements, which meet the highest requirements even for the most difficult problem solutions.
