Silicone End Wrap Tape

BST-SCT Silicone End Wrap Tape is made by silicone, it is self-free which is self-fuses when wrapped over itself.
The tape is overlaped by 50% when wrapping, which provides the entire assembly with stability.
It is self bonding to itself and other silicone rubber sleeve and tape, providing a waterproof/air tight end to the installation of fire sleeve over hoses and cables.

DATASHEET		
Part Number	Thickness	Width
	mm	m
BST-SCT-0.3	0.3	25
BST-SCT-0.4	0.4	25
BST-SCT-0.5	0.5	25

Technical Datasheet	
Material	Silicone
Working temperature	-40℃ - +260℃
Flammability	VW-1
Melting point	+550℃
Standard Color	Red
Standard thickness	0.3 mm
MOQ	500 meter each size
Cutting tool	Scissors

Notes:
The part NO. will be followed by BK for black color, GR for gray color, OR for orange color, BL for blue color. Special color upon request.
Special thickness and width upon request
Special length or packing upon request.
