

YPSOTEC

PRECISION SOLUTIONS

Ypsotec: Supplier of custom made and standard implants, instruments and precision components.

Ypsotec is one of the leading Swiss manufacturers of precision and complex components requiring high quality surface finishing – or laser welding technology. We have long-standing partnerships with numerous leading medical device companies.

Ypsotec is a flexible and creative company able to offer customers parts as required according to qualified and validated processes. As a complete manufacturer, we are also highly competitive for laser welded parts and sub-assemblies. We meet all customer requirements and specifications with our new and state of the art finishing centre. The assembly of turned and milled parts or single components into subassemblies belong also to our services. We have high quality standards, thanks to our well educated and motivated staff, a well established quality system, and our logistics competence.

Turned and Milled parts

All our Ypsotec's turned and milled parts are manufactured to the highest precision standards. Permanent investments in machinery and regular training of our experienced and professional employees are realized to meet our customer's requirements. Our flexibility is reflected in the variety of materials used in production: We process light and non-ferrous metals, steels as well as titanium, CoCr and PEEK.

Laser Technology

Ypsotec provides high precision laser welding competencies utilizing the most modern

JAG laser technology and methodology. Our experienced professional personnel bring new cost effective solutions to the field of laser marking, laser engraving in addition to laser welding.

Quality

Quality is our first goal to fulfil customer and regulatory requirements. As a proven organization, combined with profound technical know how, we are able to implement and manage complex projects. Ypsotec guarantees traceability and validated processes according to the latest standards and customer's requirements. Extensive testing procedures ensure that turned / milled parts and subassemblies are delivered according to the customer's specifications. Quality is not only the guideline during the manufacturing process of our products, but also accompanies the execution of all services – from quotation to delivery.

Ypsotec is ISO-certified
– ISO 9001 Quality management
– ISO 13485 Medical devices standard since 2002
– ISO 14001 Environmental management
