

LEADING IN PRODUCTION EFFICIENCY

# iTAC.MES.Suite

## MES FOR THE PRODUCTION OF THE FUTURE

**Shop floor meets IT** – Built on years of experience in system manufacturing, iTAC.MES.Suite has developed into a feature packed MES-Solution for the automotive industry. iTAC's advanced core technologies in combination with Dürr's process know-how have shaped a modular and flexible software solution for complete production chains.

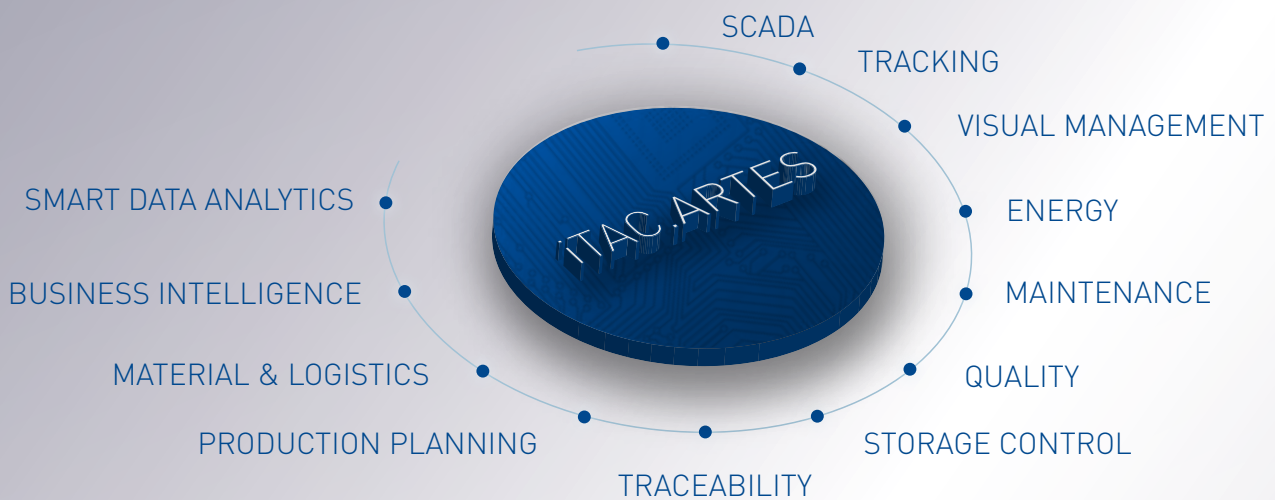

The iTAC.MES.Suite provides a vast selection of tools specifically designed for automotive application. Operators can monitor and control processes as well as car body movements with ease. This experience is enhanced by a powerful reporting system that enables users to build concise reports via drag&drop.

Throughout the complete system sophisticated cluster deployment solutions and load balancing mechanisms assure a high availability and performance.

Paving the way for the future is critical, and with the iTAC.MES.Suite our customers are ready. The system has been designed with cloud-integration and Big-Data evaluations in mind, making the iTAC.MES.Suite an investment in the tomorrow of today's world.
