MORE EFFICIENT **PRODUCTION**

With industrial software from ccc

ABOUT US

WHO WE ARE

The ccc software gmbh is a medium-sized company in the best sense. We are large enough to implement complex projects, and simultaneously small enough to respond quickly and flexibly to the needs of our customers. The facts speak for themselves: 25 years of successful business activities and a large number of cu stomers who have trusted us for many years.

Based in Leipzig, we serve customers all over Germany - and even beyond. Our software can be used in all manufacturing companies. Since 1990, we have acquired specialised know-how in the fields of metal and glass processing, the food industry and suppliers for the automotive industry.

We listen.
    We understand.
We advise.
    We take action.

We achieve the best solution for you.

OUR PROMISE

→ We are always there for you

→ We support you all the way

→ We strive to be faster than you expect

→ We help you to become better

→ We keep our promises

OUR MISSION

01 We take the time and provide detailed analysis and consultation. Subsequently, proven modules are compiled according to your requirements and receive the individual fine-tuning.

02 Our employees understand your business and your requirements. They are able to advise you and develop the best possible solution.

# HOW WE WORK

FROM IDEA TO CONCEPT

Our work for you starts as an idea. We listen to you, get to know your work processes and see how your company works. We then create a detailed requirements analysis. We examine the specificity of your company, advise you on possible solutions and, together with you, we create your concept.

FROM CONCEPT TO SOLUTION

We expand the concept into a software that is precisely tailored to your company. We assemble proven modules according to your needs, and give them a unique touch.

Objectives Analysis of the status quo Requirements Consulting	**REQUIREMENTS ANALYSIS**
Architecture Databases Interfaces Data security	**CONCEPTION & DESIGN**
Module combination Iterative approach Quality assurance Documentation	**IMPLEMENTATION**
Installation Training On-site support	**COMMISSIONING**
24 months warranty On-call service	**SUPPORT & SERVICE**

PROFESSIONAL IT PROJECT MANAGEMENT

In the end, we develop a solution for your exact needs - a slim, ergonomic software that perfectly matches your processes and requirements. It integrates seamlessly into your existing IT structures and is intuitive to use. The software works exactly as expected, and can scale to your tasks.

Our team ensures smooth on-site implementation of the software. This also includes training your employees so that they can make the best use of the software. We are available to you even after roll-out - 24 hours, 7 days a week.

OUR **SOLUTION** - YOUR **BENEFITS**

PRODUCTION DATA MANAGEMENT

We collect all production data and link it together. This gives you a perfect basis for the optimisation of your processes, depending on whether you want to increase quality, reduce energy costs or minimise downtimes. Or how about all of it?

ENERGY MANAGEMENT

We link your energy consumption data with your production data. Our „data inspector" enables you to recognise hidden potential savings quickly and easily. Evaluate and analyse your data to achieve the greatest benefits.
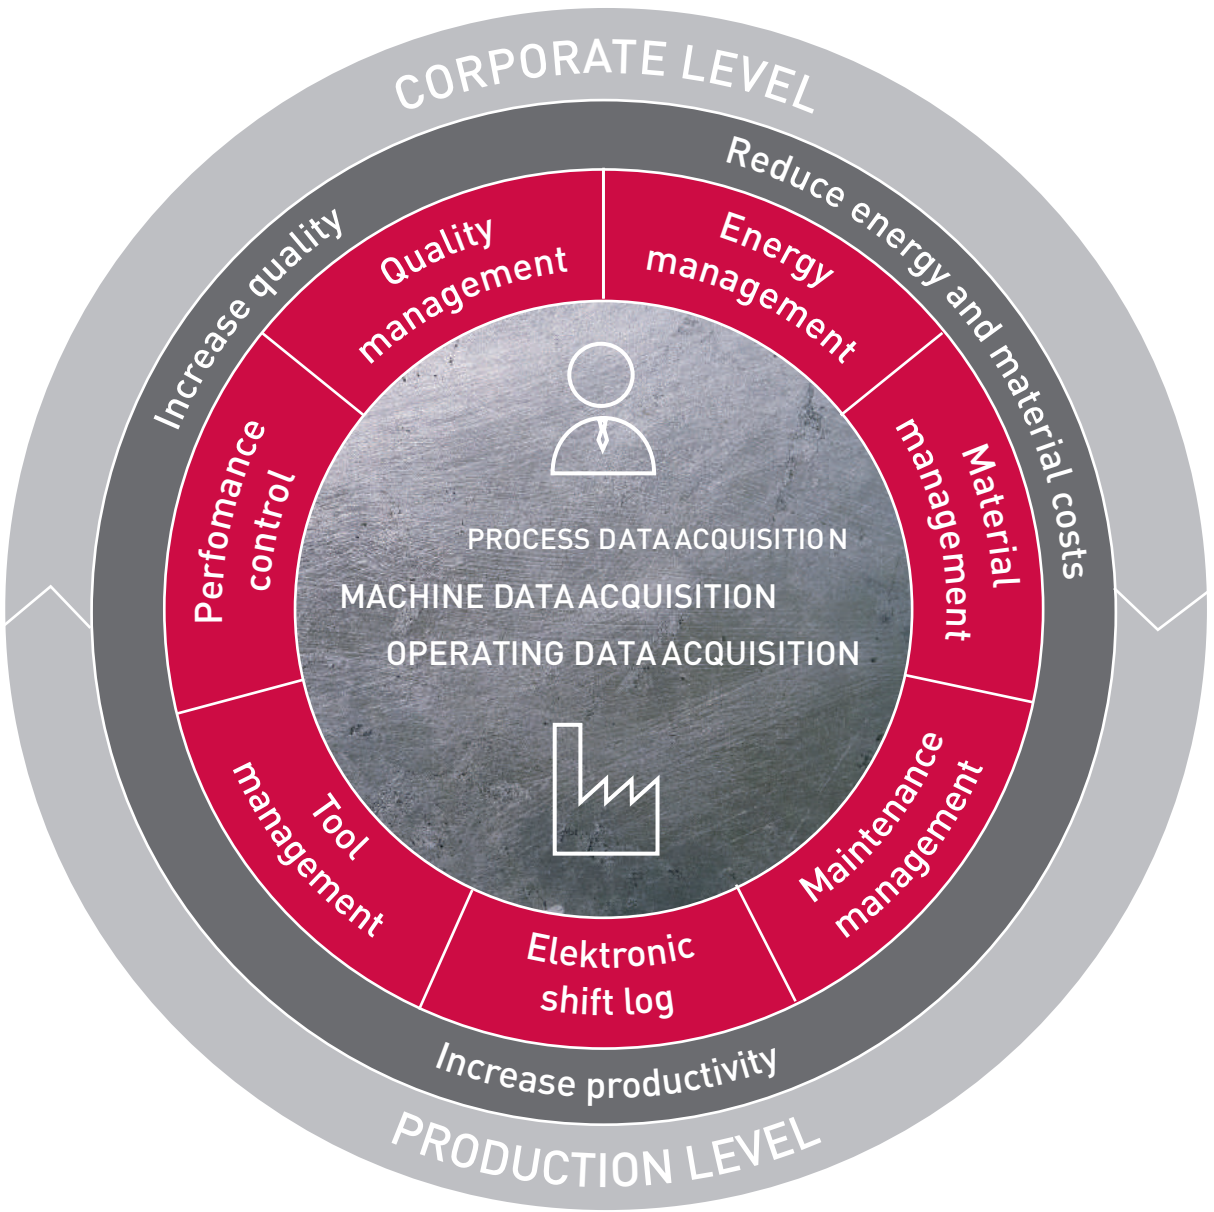

MAINTENANCE MANAGEMENT

With our maintenance software, you can plan repetitive maintenance and inspection procedures, keep an eye on inspection and maintenance regulations and identify weaknesses and optimisation potential.

ELECTRONIC SHIFT LOG

We combine paper shift logs and scattered notes. This enables you to document shift transfers and capture and evaluate any process and production data.

And there's more! We also offer the right software for **tool management**, quality management, **setup time optimi-sation**, material management, auxiliary and fuel management, video analysis, **downtime analysis**, storage space optimisation and other tasks.

The employees of ccc understand me and the processes of KSG. I have found a competent partner for upcoming tasks. The implementation of user-specific adaptations is not a commercial slogan, but an actual practice at ccc.

FRANK WOLF
Head of Media Supply
KSG Leiterplatten GmbH

At ccc software, we immediately felt that we are not just one of 1000 customers. Our BDE system has been adapted to our needs.

JÜRGEN STIEHLER
Production Manager,
Procurator | Auerhammer Metallwerk GmbH

With our maintenance software, I can plan maintenance tasks efficiently and reduce downtimes. This saves valuable time and reduces costs.

SIEGFRIED BEYER
Maintenance Manager
Hydro Aluminum Foundry Rackwitz GmbH

THOMAS NEUMANN
Head of Electroplating
SAXONIA Galvanik GmbH

Support is crucial when using an MES software. Changes in the company have to be implemented quickly and competently, and ccc provides excellent support at our site in Göttingen.

With the maintenance management of ccc software, we finally have our maintenance planning firmly under control. We were particularly impressed by the fast and accurate implementation of our requirements for the introduction of the system.

DR. JOHANNES SANDROCK
Operations Manager
Novelis Germany GmbH
Plant in Göttingen
