TECHNOLOGICAL INNOVATION

MURGE

A photograph of several sailboats on a blue ocean under a clear sky. The word 'MURGE' is overlaid in large, teal, sans-serif capital letters across the middle of the image, partially obscuring the sailboats.

CORPORATE MISSION: To focus on electrical technology innovation, and to contribute our share to smart grid construction.

CORPORATE VISION: Committed to being a first-class brand supplier in medium voltage electrical equipment industry.

VALUES: Integrity Concentration Cooperation Motivation

CORE IDEAS: Focus on user, Just do better

BUSINESS PHILOSOPHY: To create values for customers, opportunities for employees, and benefit for society.

COMPANY PROFILE

Since its foundation in 2010, Murge Electric Co., Ltd., has been engaged in R&D, manufacture and sales of green gas insulated switchgear, MV vacuum circuit breaker, earthing switch and electrical accessories. It has a registered capital of 28 million US dollars, covering an area of 84000m² and having staff over 500. It is located in Wenzhou Economic and Technological Development Zone.

Murge has established a sound management system in accordance with the ISO9001 Quality Management System, ISO14001 Environmental Management System, OHSAS18001 Occupational Health and Safety Management System and other standards. With strong technical R&D capacity, it forges an advanced intelligent manufacturing system based on lean production and integration of information technology and industrialization. We have imported advanced production and testing equipment such as Japanese-made CNC punching machine, laser cutting machine, automatic welding robot, helium leak detection equipment, and APG injection machine. Our products have obtained relevant certificates at home and abroad, and are well-received by customers owing to good quality and service.

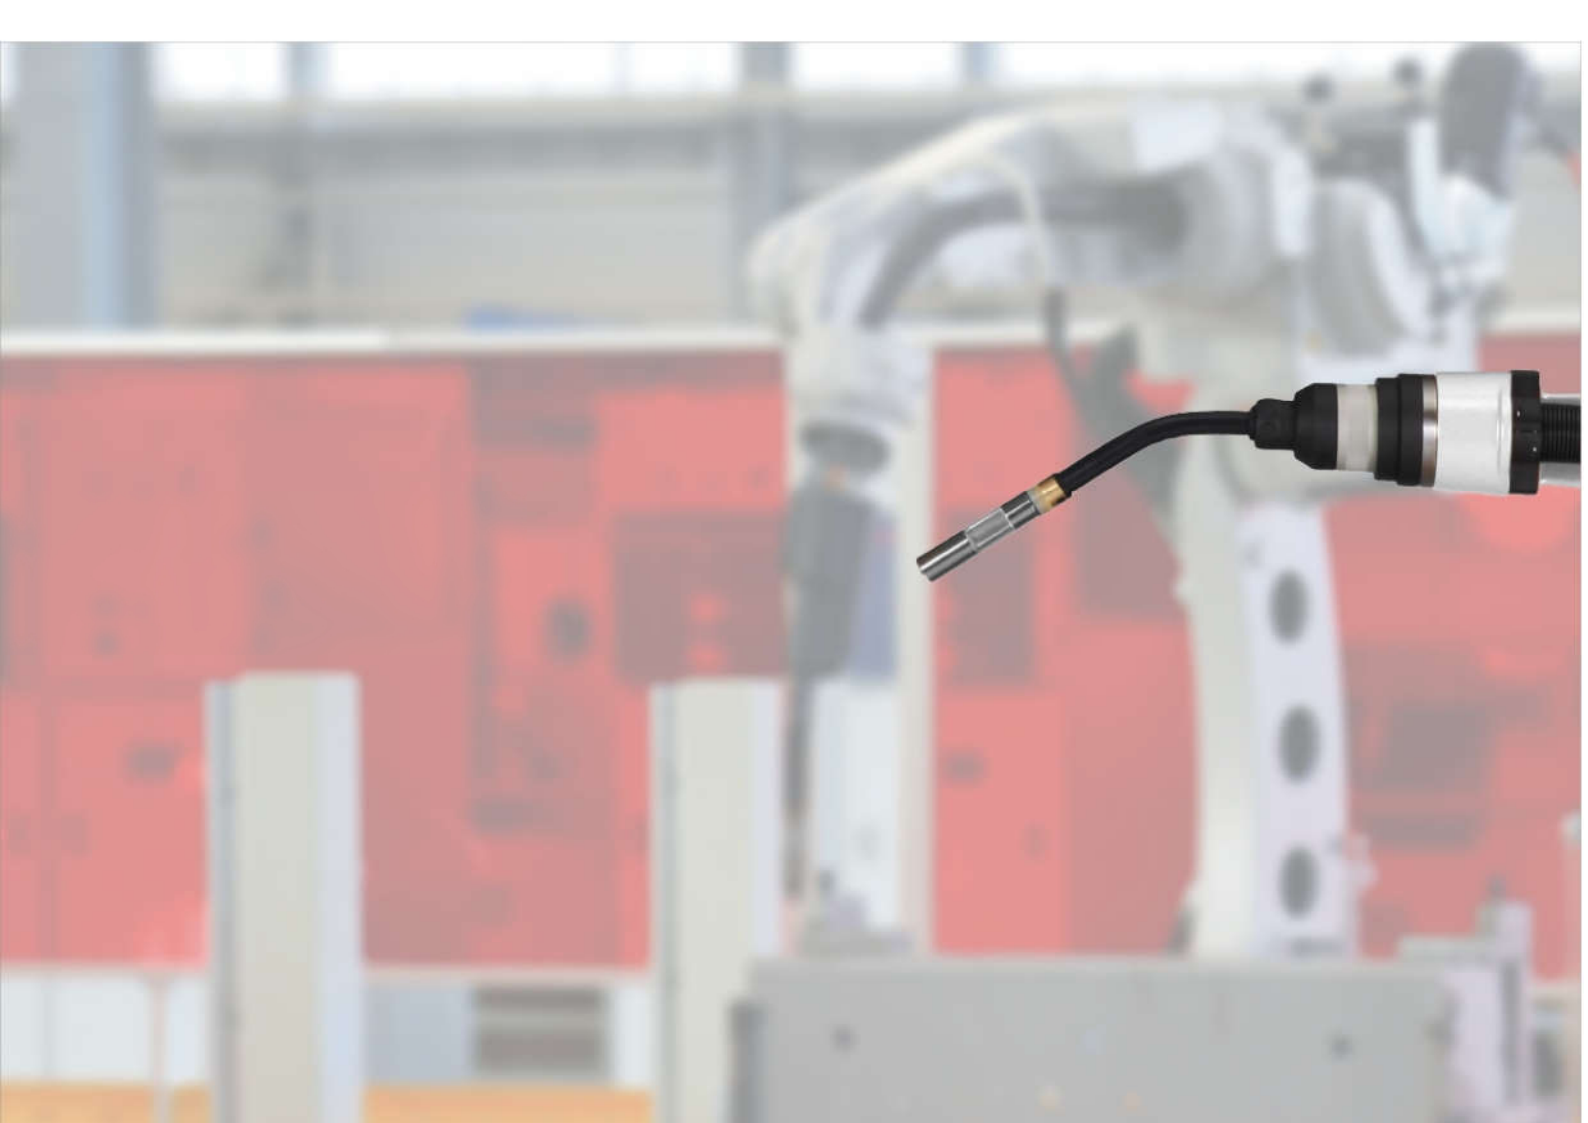

Focus on user, just do better. Adhering to the conception of customer orientation, the company manages to become a benchmarking enterprise through innovation of business mode.

SOPHISTICATED EQUIPMENT

Independently developing the lean manufacturing information management system, Murge conducts continuous improvement on lean production, manufacturing capabilities to meet your needs, exceed your expectations and win your trust.

Murge employs cutting-edge automation equipment including laser CNC sheet metal processing equipment, injection molding machines, central feeding systems, robotic bending equipment, pressure gel hydraulic molding machines, automated assembly lines, stamping equipment, robotic welding equipment as well as a top-tier sheet metal processing lines and circuit breaker assembly lines.

Corporate Vision:

Remaining committed to becoming a world-class supplier in the industry of medium-voltage electrical equipments

World-class
