

Funds raised for the American Cancer Society and Breast Cancer Research

## We Care

Corporate Social Responsibility matters to us. It means taking care of those we work with in creative, fun, & rewarding ways. We also realize that our efforts must extend beyond helping our customers, colleagues & suppliers, so we aim to help those in our communities to succeed as well.

## Award-Winning Impact in Illinois

Two-time recipient of the Illinois Sustainability Award recognizing Illinois organizations who implement outstanding sustainable technologies and demonstrate a strong commitment to sustaining our environmental, social, and economic health.

## Community Outreach

One percent of our revenues go to charitable causes and we sponsor opportunities for our employees to give back through fund raising and volunteering.

## Global Leadership

In 2019 we were named in Real Leaders Magazine's list of top 100 positive impact companies across the globe who leverage the engine of capitalism for greater good.

Our properties feature a fruit tree orchard, rain garden, prairie flower garden, two registered Monarch waystations, and a beehive!

## SOLBERG Guiding Principles

*We Succeed as a Family*  
*We Do the Right Thing*  
*We Endeavor to be the Best*  
*We Take Care of the Customer*  
*We Play Hard to Win*  
*We Love our Planet*

### **Who We Are**

Solberg is an exciting, growth focused US-based manufacturer with 20 facilities & offices located throughout North America, Europe, Asia, South America and Australia. We engineer and create filtration, separation, & silencing solutions for some of the most well-known companies in the world. Our US headquarters, located in Itasca, IL, supports customers ranging from original equipment manufacturers to resellers to end-users in highly diverse industrial markets. Our commitment to partner with customers creates a fun, energetic, focused and fast-paced team environment that facilitates personal & professional growth.

### **We Are a B Corp**

Certified B Corporations are a new kind of business that balances purpose and profit. In all endeavors, we consider and document the impact of our company's decisions on our workers, customers, suppliers, community, and the environment. Maintaining the B Corp certification ensures that we are part of a growing business community that is dedicated to using organizational efforts and resources as a force for good.

*Rooftop solar panels capable of offsetting 100% energy used in production.*

### **We Love Our Planet**

As a global manufacturer and supplier to industries around the world, we think growing responsibly is essential for long term success. This belief drives us to find and implement ways to reduce our environmental footprint.

#### **We Use Renewable Energy Sources!**

We use energy from solar and wind power technologies in our US production and assembly processes. 100% of our electricity is clean!

#### **We Divert Waste!**

We reduce, reuse, and recycle all that we can. Over the last decade, our robust recycling program and use of recycled and renewable materials in our processes allows us to divert approximately 80% of our waste and scrap away from landfills today.

#### **We Use Eco-friendly Materials!**

We are an early adopter for incorporating bio-derivative materials and supplies into our processes, resulting in significantly reduced amounts of volatile organic compounds (VOC) emitted during the production of our products.

*Liquid Separator tanks for vacuum applications.*

### **We Protect People, Places & Things**

Our products protect the environment, protect equipment, and help keep industrial working conditions safe. Lower maintenance costs, reduced downtime, and better surroundings are just a few of the benefits Solberg's solution-based designs provide.

**Air Filtration:** protects equipment from airborne abrasive particles that can damage rotating pneumatic pumps and compressors.

**Oil Mist Elimination:** removes visible oil mist emissions from an air stream which can then be returned to the equipment to reduce oil consumption.

**Liquid Separation/Vapor Condensing:** keeps harmful liquids and vapors out of equipment and their lubrication oils.

**Silencing:** reduces rotating equipment noise levels in work environments, improving the health & safety of workers.
