Industrie 4.0 in Baden-Württemberg

Allianz Industrie 4.0 Baden-Württemberg

A network created to build the future of industry

Allianz Industrie 4.0 Baden-Württemberg is a network founded and sponsored by the Ministry of Economic Affairs, Labour and Housing Baden-Württemberg.

Our aim is to pool technological expertise in production as well as IT and communications to provide support for medium-sized industrial companies in their shift towards Industrie 4.0. The coordination office is located at the VDMA Baden-Württemberg.

Together with the network partners from companies, chambers of commerce, associations, institutes of applied research and social partners, we are striving to make Baden-Württemberg one of the world's leading regions for Industrie 4.0 technologies.

To achieve this goal, we provide support and reinforcement through a comprehensive package of activities for direct collaboration among all players.

Small- and medium-sized companies play a key role and are the focus of our work. The close integration of the various involved industries and fields of technology allows them to benefit from the Allianz to a particularly high degree.

At our joint booth established companies, startups and scientific institutions from Baden-Württemberg present their latest developments and improvements to their processes, services or products with a special emphasis placed on Industrie 4.0 solutions.

Discover what the industrial future will look like!
