

Stainless Steel Bearing

NBVO stainless steel bearings bring unique capabilities for food processing and packaging, beverage, medical and marine equipment. Our engineers combine advanced bearing design expertise with broad industry knowledge to satisfy the toughest application requirements.

Products name	Stainless steel ball bearing
Brand name	NBVO or Neutral
Material	Stainless steel (SUS440)
Quality standard	ISO9001:2008
Accuracy class	ABEC-1 (P0), ABEC-3 (P6), ABEC-5 (P5)
Noise Level	Z2, Z3
Sealing/Shield	Open, ZZ, 2RS, RSZ
Product Benefits	Compared with common chrome steel bearings, stainless steel bearings have stronger rust and anti corrosion performances and heat resistant stainless steel bearing can be used under -60C ~ +300C high temperature environment.
Application	Medical apparatus and instruments, marine, cryogenic engineering, optical instrument, high-speed machine, high-speed electric machinery, printing machinery, food equipment.
Packaging	A: Tube package + outer carton + pallet B: Small single color box + outer carton + pallet C: According to your requirement
Delivery Details	Lead time: 10-15 working days standard specifications, customized design takes 30-40 days Shipping time: 30-35 days by sea 5-7 days by air 3-5 days by express delivery
