bill-X
Collect. Manage. Execute.

```
method:
unlatch
rotate
```

```
roller values
start: 2018-02-17
operation#id: 5B7W6
status: active
rotation degree: 2.0
min rotation: 50
max rotation: 300
```

## ACTIVE DB

No more tedious switching between different systems or differentiating between virtual and real elements – whether you are active in asset management, connected services or industry 4.0: With Active DB you control and manage all desired objects and processes of your company centrally via our innovative database concept.

- flexible integration into existing system architectures
- online updateable
- active management of objects, processes and actions
- transfer of old process components
- no need for complex synchronization processes
