

## 0.8MM PU CONVEYOR BELT

Product name	White PU Conveyor belt for food industry
Total thickness:	0.8mm
Max width:	2000mm
Ply	1
Material:	PU
Top hardness:	85 shore A
Top surface:	Mini diamond
Color:	White/Green/Blue
Bottom material:	Fabric
Bottom surface:	Rough
Temperature range:	~-20℃~80℃
Application:	Food industry

### Detailed descriptions:

1. One layer of fabric, one layer of PU
2. Total thickness of 0.8 mm
3. The combination of fabric and PU glue ensures the stability of the belts
4. The belt is manufactured with international food grade standard.
5. Approved by FDA and EU certificate, it has good performance in oil resistance, wear resistance and cutting resistance.
6. High work efficiency and production capacity guarantee the sufficient products support and quick delivery.

JRL's conveyor belts are able to work stably under various complicated conditions. It can maintain its high conduction efficiency under the temperature from -20 to +80℃

JRL's belt are widely applied in diversified industrial fields, such as logistic industries in airport, post office, conveying or sorting goods in food industry, or marble, ceramics tiles, or stones processing industry etc.

JRL has updated our equipment and innovates our producing technology to make sure the stability in performance.
