

Greater Life

Shhhh...the secret to a longer life is the K7VG180/265

The next generation of K3VG pumps, the **K7VG** is designed for use with industrial machinery such as injection moulding machines, steel plant and hydraulic press machinery. This is a **highly reliable** and **efficient** unit for **long service life** under the most extreme operating conditions.

- Low noise and high control stability
- Vertical and horizontal mounting
- Negative and positive displacement control
- Optional through drives available
- 350 bar rated, 400 bar peak
- Compact & stronger structure
- Upgrade on K3VG
- ISO 4 bolt mount JIS parallel keyed shaft
