

Greater Power

The HPC is the new "class leading" high power variable displacement radial piston motor solution from Kawasaki.

Benefits:

- Enhanced power performance
- Improved starting and running efficiency
- Increased operating speed range
- Increased back pressure capability
- Improved displacement range selection

Features:

- Low friction brass inserted pistons
- Tin plated conrods
- Larger conrod restrictors
- Nitro-carburizing for improved wear performance
- Improved wear resistant motorcase material
- Crankcase flushing flow for thermal stability
