

represents

**WEIPPERT TECHNIK**

We produce screws and nuts with metric threads as well as washers out of high tensile, fibre reinforced plastics. Our fasteners have

- resistance to corrosion
- low self-weight
- no electrical conductivity

Our standard products are made of PA with 30% or 50% glass fibre content and are Reach- and Rohs-conform. Within the glass fibre content they achieve

**higher tensile strength**  
**higher torque values**

than unfilled PA- or Nylonscrews.

## Our delivery possibilities:

WT-flathead screws  
with TX-drive

WT-hexagonhead screws

WT-cylinderhead screws

WT-countersunk screws  
with TX-drive

WT-nuts

WT-washers

Price and delivery time on request

### WT-flathead screws with TX-drive

#### WT-hexagonhead screws

#### WT-cylinderhead screws

thread size	length in mm				
M3	10	16	20		
M4	10	12	16	20	
M5	10	16	20	25	30
M6	25	40			
M8	40	80			

#### WT-hexagon head screws

#### WT-cylinderhead screws

thread size	length in mm
M10	80

#### WT-countersunk screws with TX-drive

thread size	length in mm			
M3	10	16	25	
M4	10	16	20	
M5	10	16	25	

#### WT-shaft countersunk screws with TX-drive

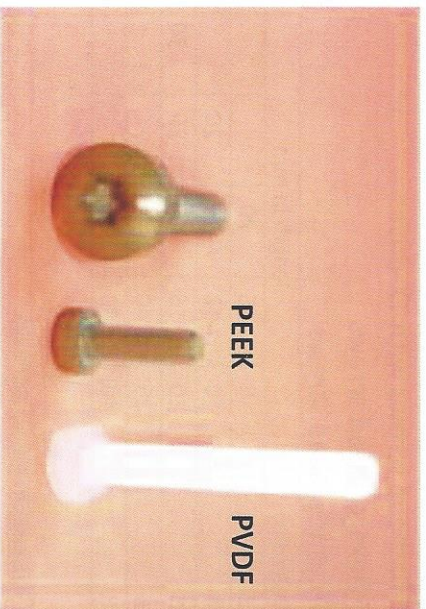

thread size	length in mm
M8	80

#### WT-nuts

thread size	M4, M5, M6 and M8
M8 longnuts	length 30 mm
M10	in planning

#### WT-washers

M4	in planning				
M5	in planning				
M6	18,0	6,5	3,2	2,9	
M8	22,0	8,5	3,2	2,9	
M10	in planning				
M12	24,0	13,0	2,7		

Our own injection moulds enable us to process plastics like

**PEEK** (high temperature stability) and

**PVDF** (chemical resistance)

or **PC, PE, POM, PP, PPA, PVC**

in a short time.

We can realize different customer requests in relation to

**UL-listing**

**KTW - / FDA – approvals**

or other plastic types as well as colours depending on availability.
