EASE++

The employee-friendly software

Login Autonom. Employee software.

 We develop employee-friendly software that enables us to enforce the interests of both employees and employers. This is a human and economic goal that is always worth working for and it also suits the future endeavor of our Clients for sustainable development.

Founded in 1990, in the last 28 years we met various client needs, that broadened our horizons and so our software services. From access control systems through workhour registration and management to the development and support of employee communication platform, we have worked out various software systems. Our goal is to provide employees and employers with the most time- and data-efficient solutions, to increase employees' satisfaction and productivity, as well as to earn money by saving money for our Clients.

Worktime is ticking away. It matters how. EASE++

A solid yellow rectangular bar positioned to the left of the text block.

The **EASE++** (Employee Access Software Engineering++) modules can be easily managed and include targeted features that reduce the work and decision processes. The 9 web-based modules can be implemented together, individually and in different combinations. As ready-made packages, our modules introduce best practices and can be created to serve the unique needs of the partner. We can expand and develop the packages after implementation while continuing to provide support.

EASE++ modules

Holiday - Absence and holiday planner software

Workhour - Workhour registration software

Competency - Competence and training management software

Workwear - Workwear and protective equipment registration software

Cplatform - Interactive employee communication software

Productivity - Productive-unproductive activity registration software

Guest - Guest and visitor management software

Shift - Competence and activity-based shift planning software

Access - Access control system management software

EASE++ Holiday

Absence and holiday planner software

- Computer and tablet access
- Two-click reservation
- Full functionality can be handled on the same interface
- Monitoring of minimum group and company manpower
- Integrable with any mail system

EASE++ Workhour

Workhour registration software

- Setting different worktime models
- Monitoring worktime and clearing period
- Ordering, clearing and approving overtime
- Tracking rules and controls
- Employee self-service interface

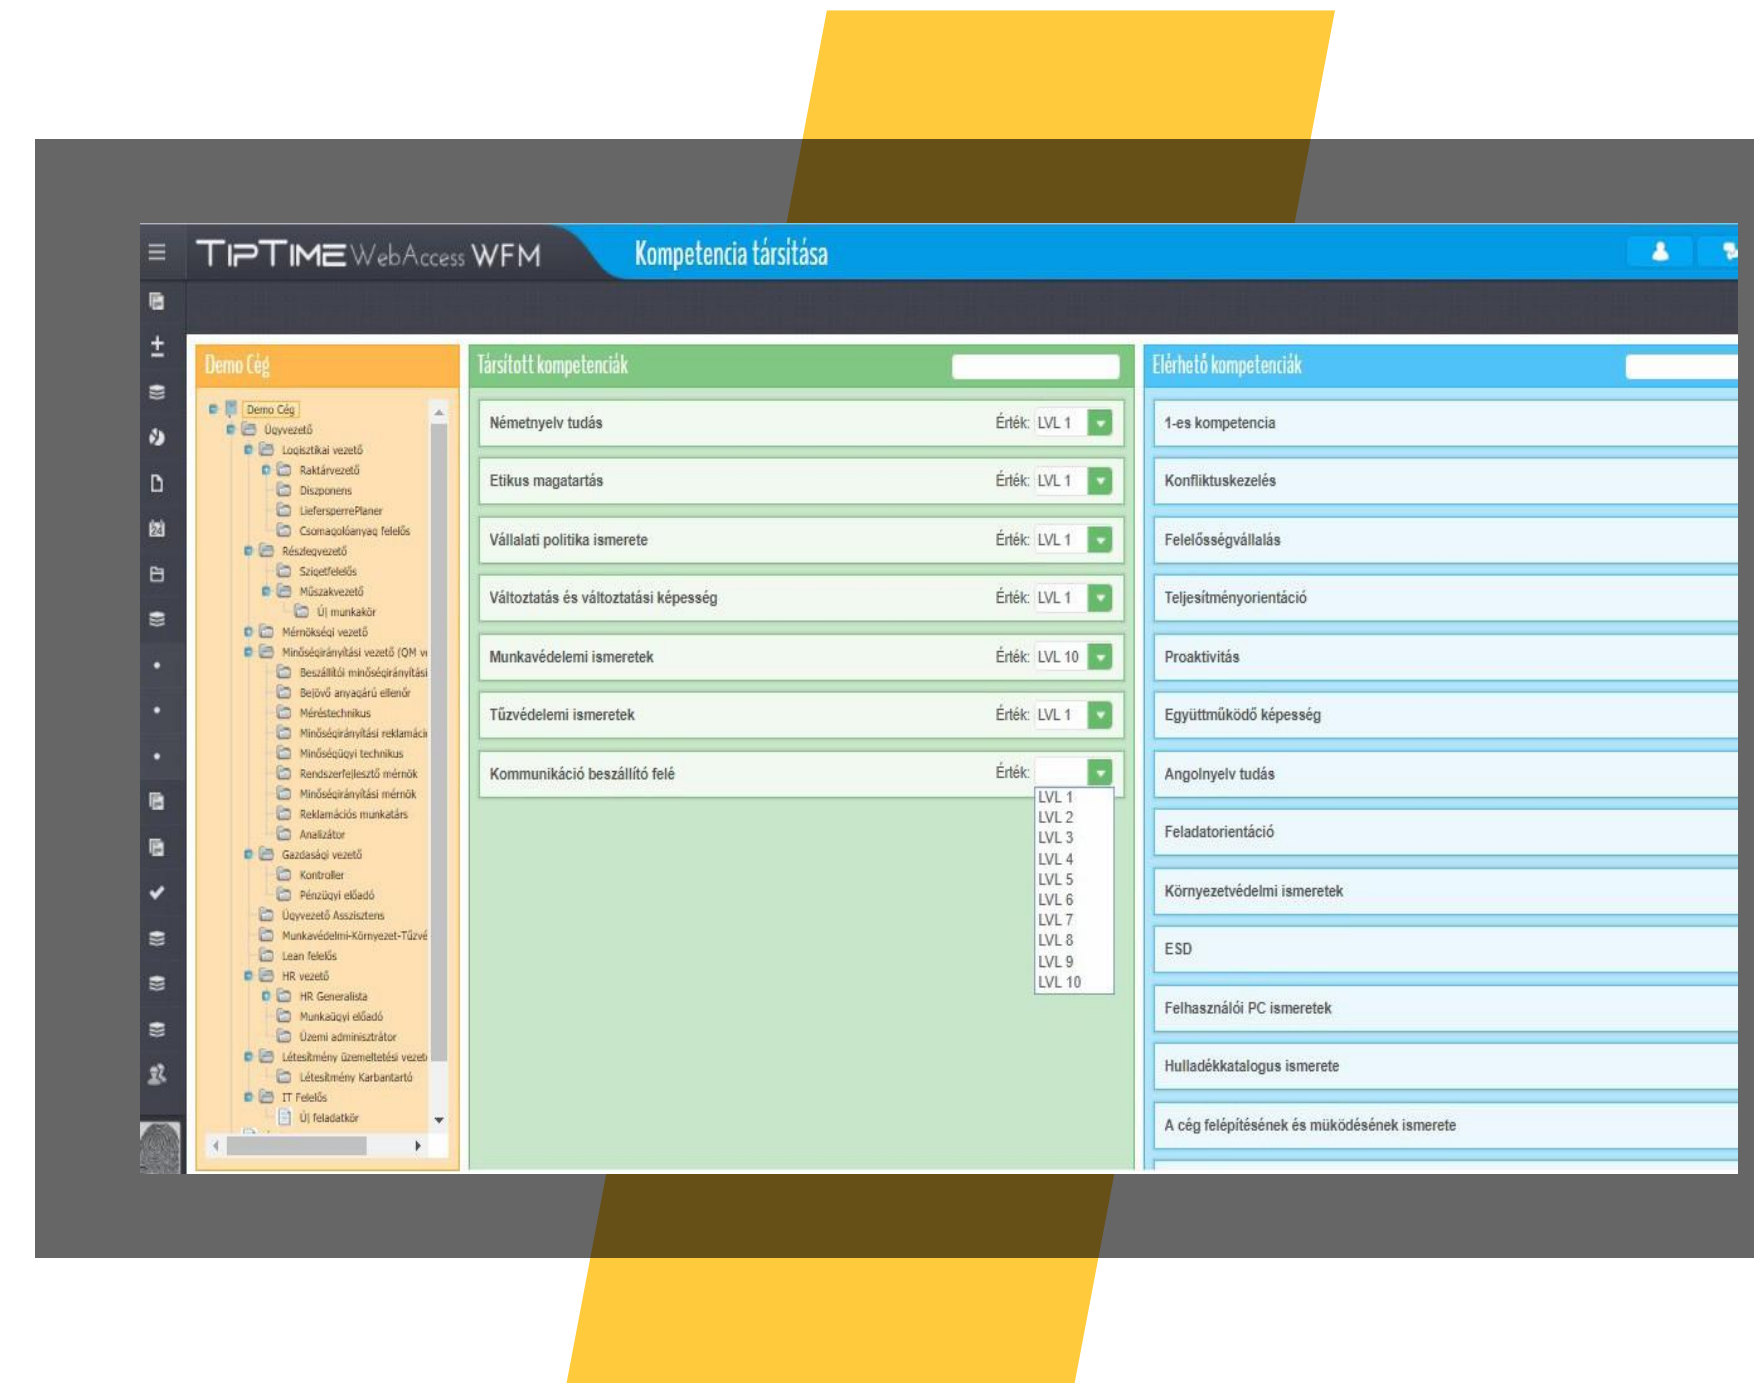

The screenshot displays the 'TIPTIME WebAccess WFM' interface for 'Dolgozó kezelés' (Employee Management). The table lists employee data with the following columns: NÉV, DOLGOZÓ AZONOSÍTÓJA, FELMONDÁS OKTÁ, FELMONDÁSI IDŐ, FELMONDÁS OKA, SSC INDEX, MANGULATI INDEX, KÖZÖSSÉGBEN BET, HIÁNYZÁS, IDŐARÁNYOS TÁVOLI KESÉSEK, TULÓRA, VEZETŐK ÉRTÉKELÉS, BECSZOTTAK ÉRTÉ, and KOLLÉGÁK ÉRTÉKE.

EASE++ Competency

Competence and training management software

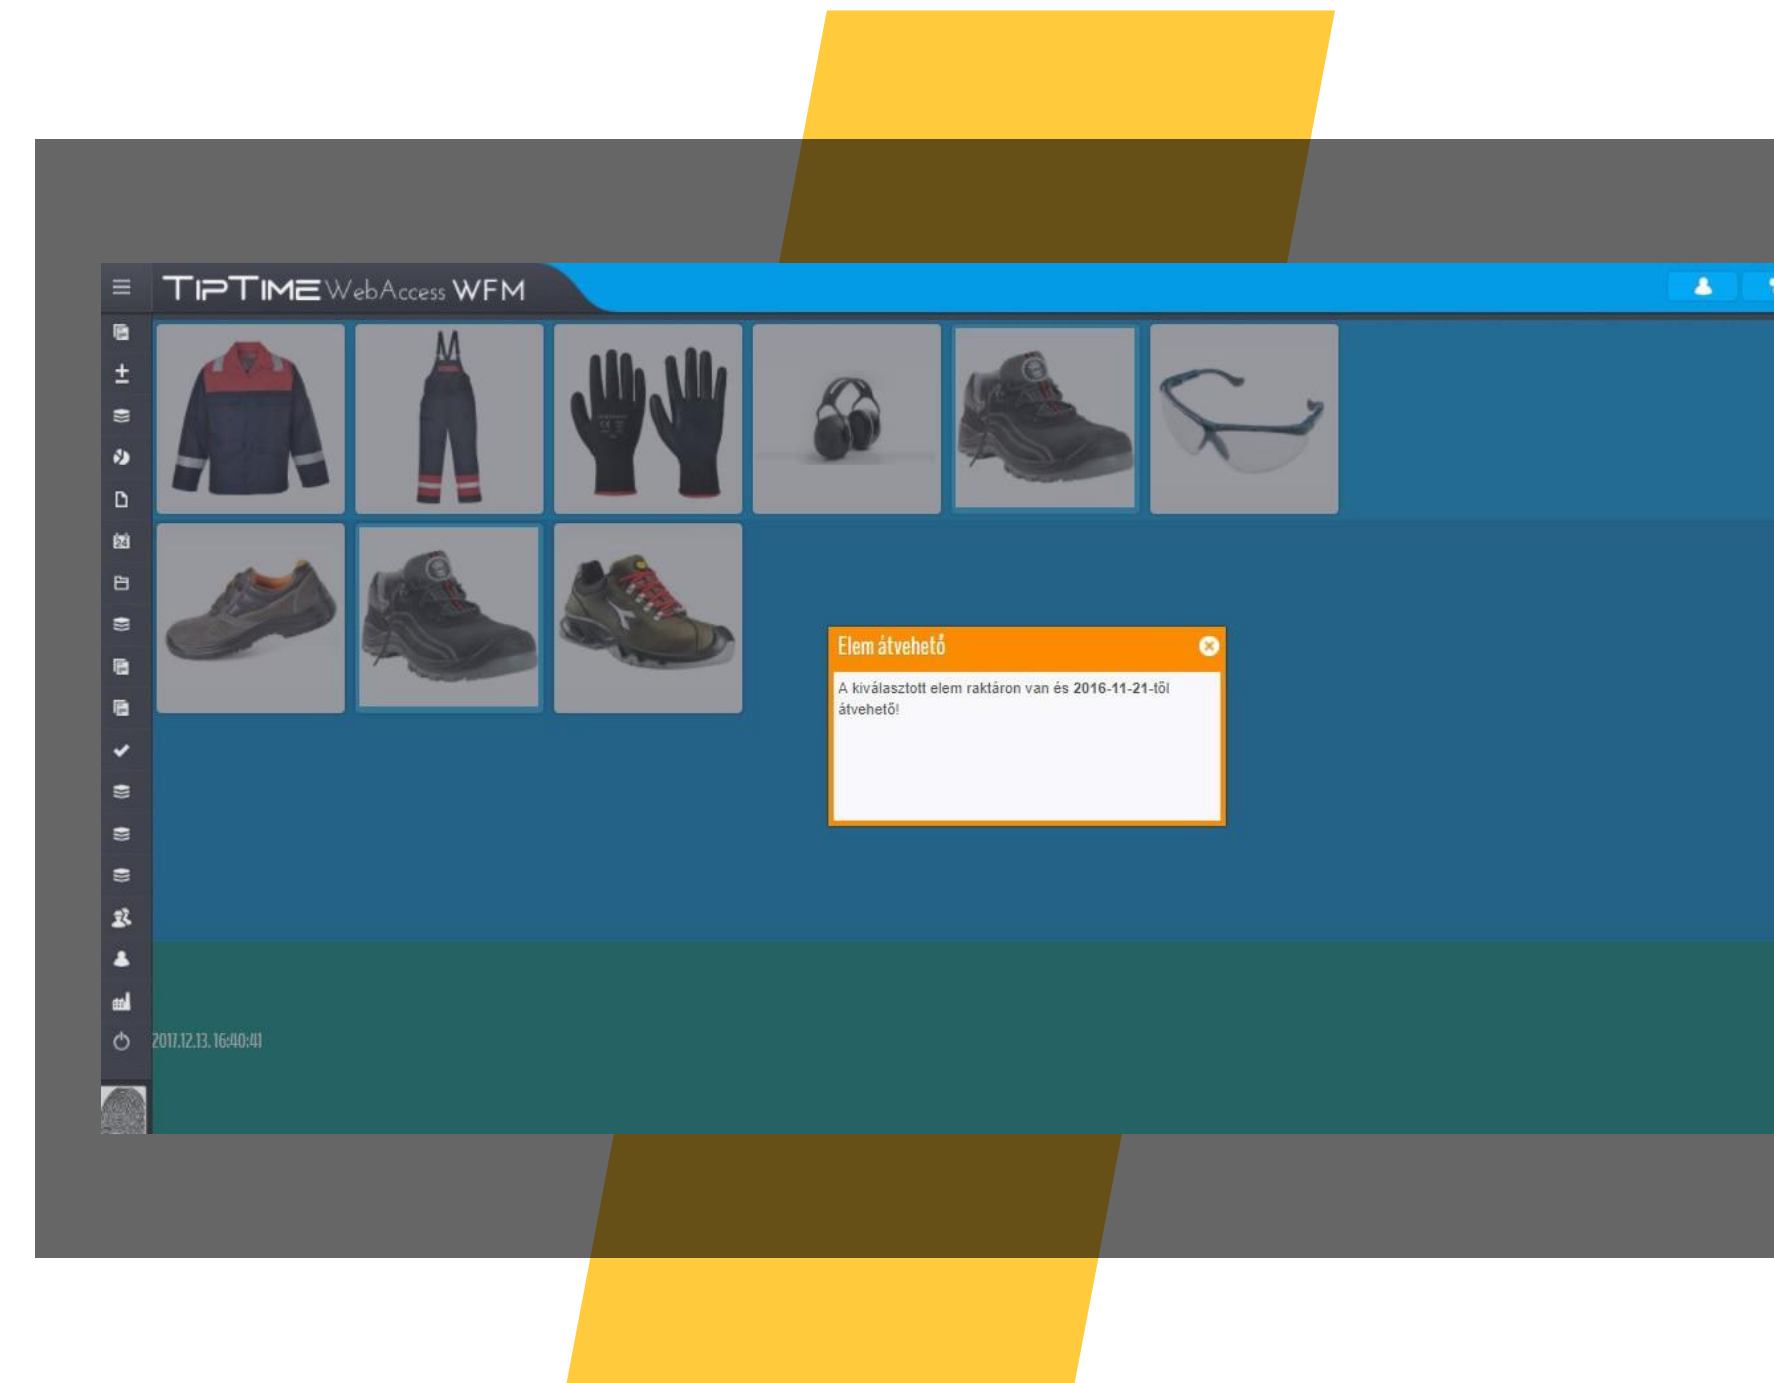

- Records skills, capabilities, qualifications and competences
- Alerts if a medical examination or a training is due
- Offers simple to 360° worker evaluations
- Application of training related courses, contacts, costs
- Generates training plan ready for financial approval

EASE++ Workwear

Workwear and protective equipment registration software

- Employee communication extension for warehouse systems
- Unified and traceable records
- Order number and release process support
- Alert for validity, expiration and attrition time, starting renewal process
- Monitoring of washing process
- Integrable with any protective device vending machine

EASE++ Cplatform

Interactive employee communication software

- Personalized profile with the features of the introduced EASE modules: workhours; holiday; training; shift; workwear; overtime; activity; satisfaction, stress, well-being and vision survey; e-Learning; employee network analysis
- Guides, videos, questionnaires, gamification elements can be implemented
- Card identification on each hardware installed in industrial environments
- It can run on any hardware, such as PCS touch-screen terminal, NOAX, Datafox, Tablet, etc.

EASE++ Productivity

Productive-unproductive activity registration software

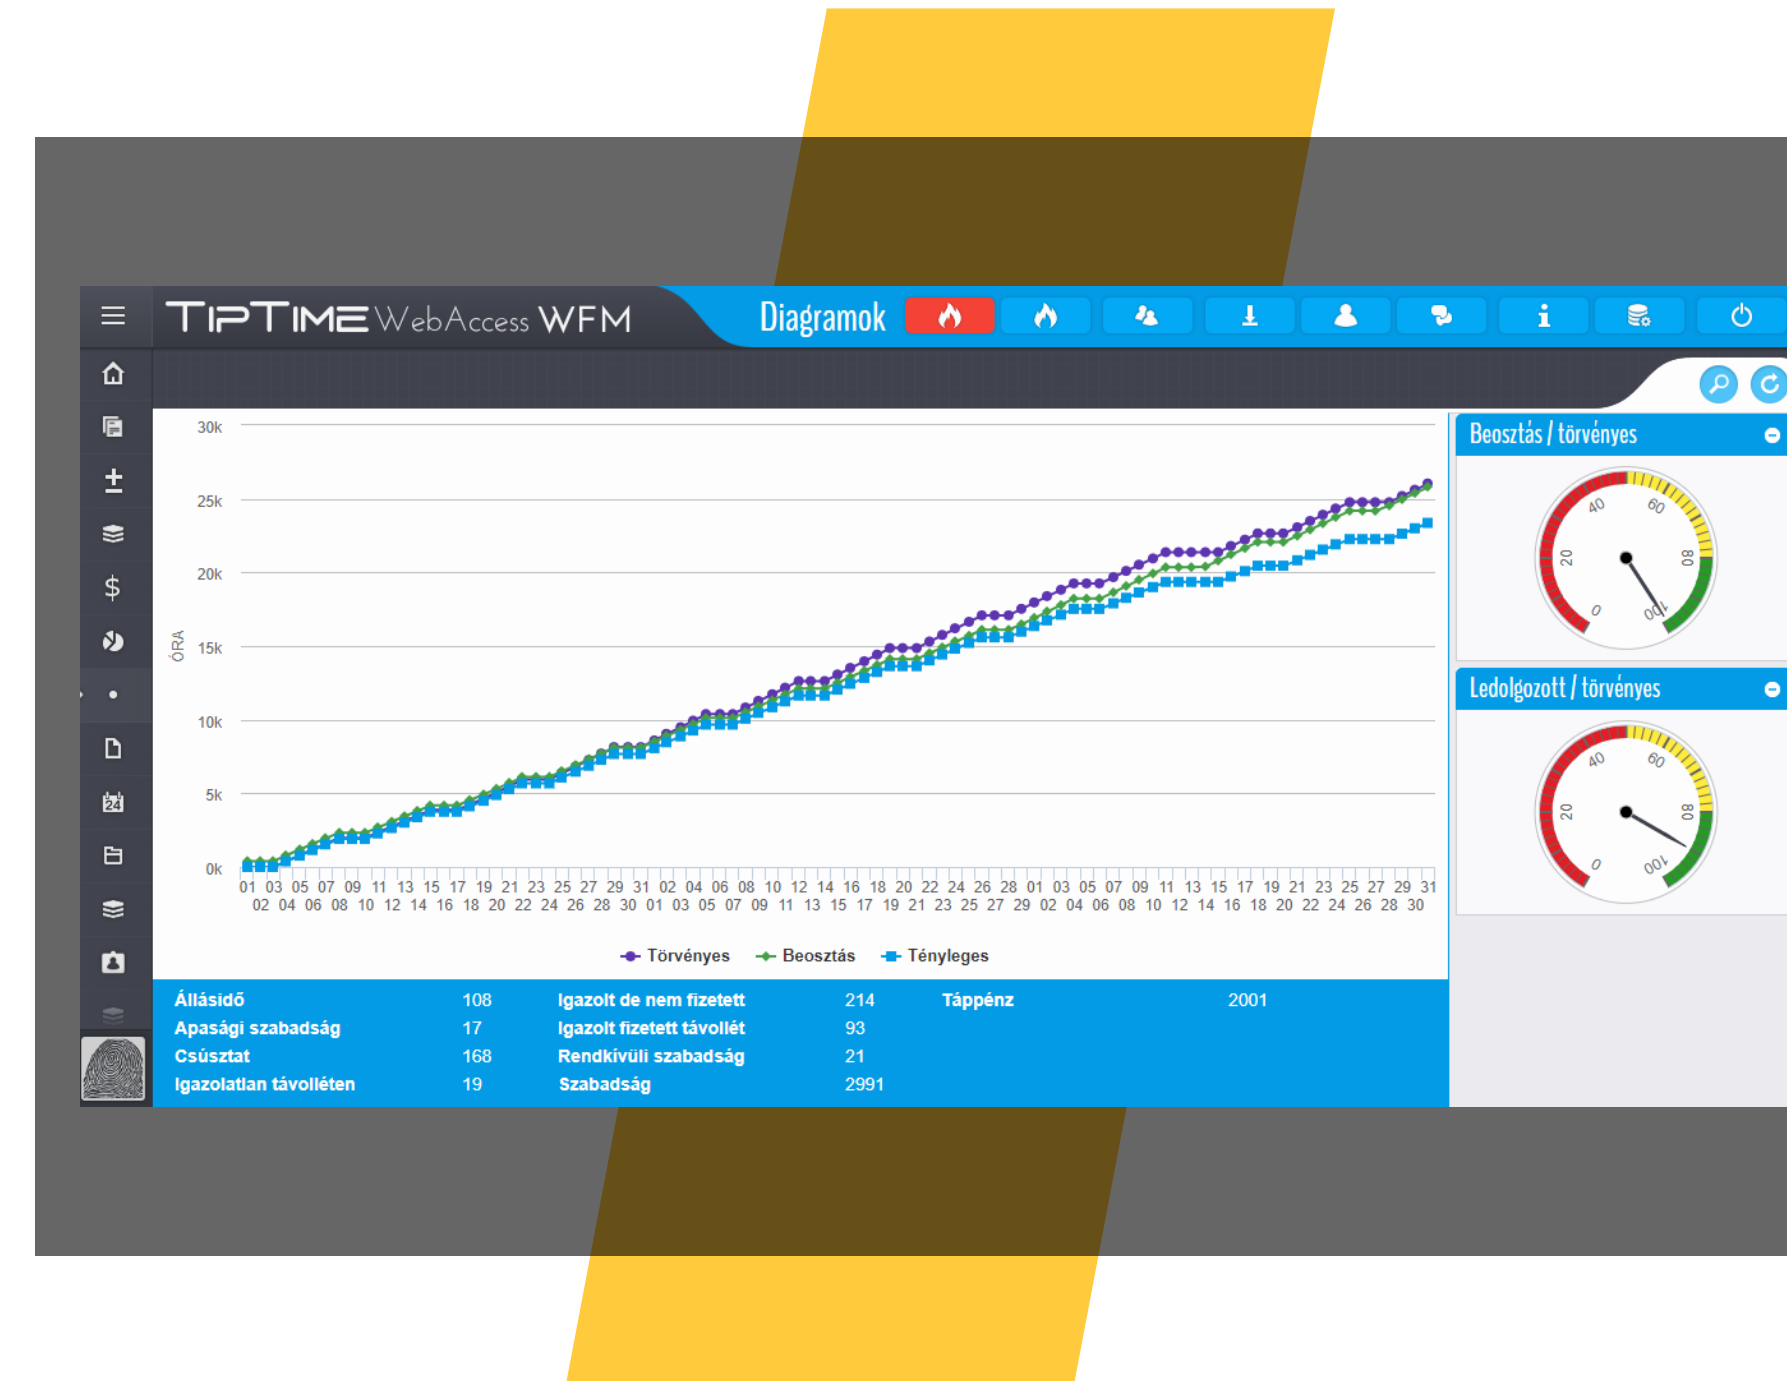

- Measures productive and unproductive activities
- Supports work optimization for employee and employer
- Charges and configures activities for cost center, cost manager, job number, project number, customer, manufacturing location, etc.
- Implementable with worksheet formats and types already used
- Integrable individually with enterprise management systems
- Data entry from any source system

EASE++ Guest

Guest and visitor management software

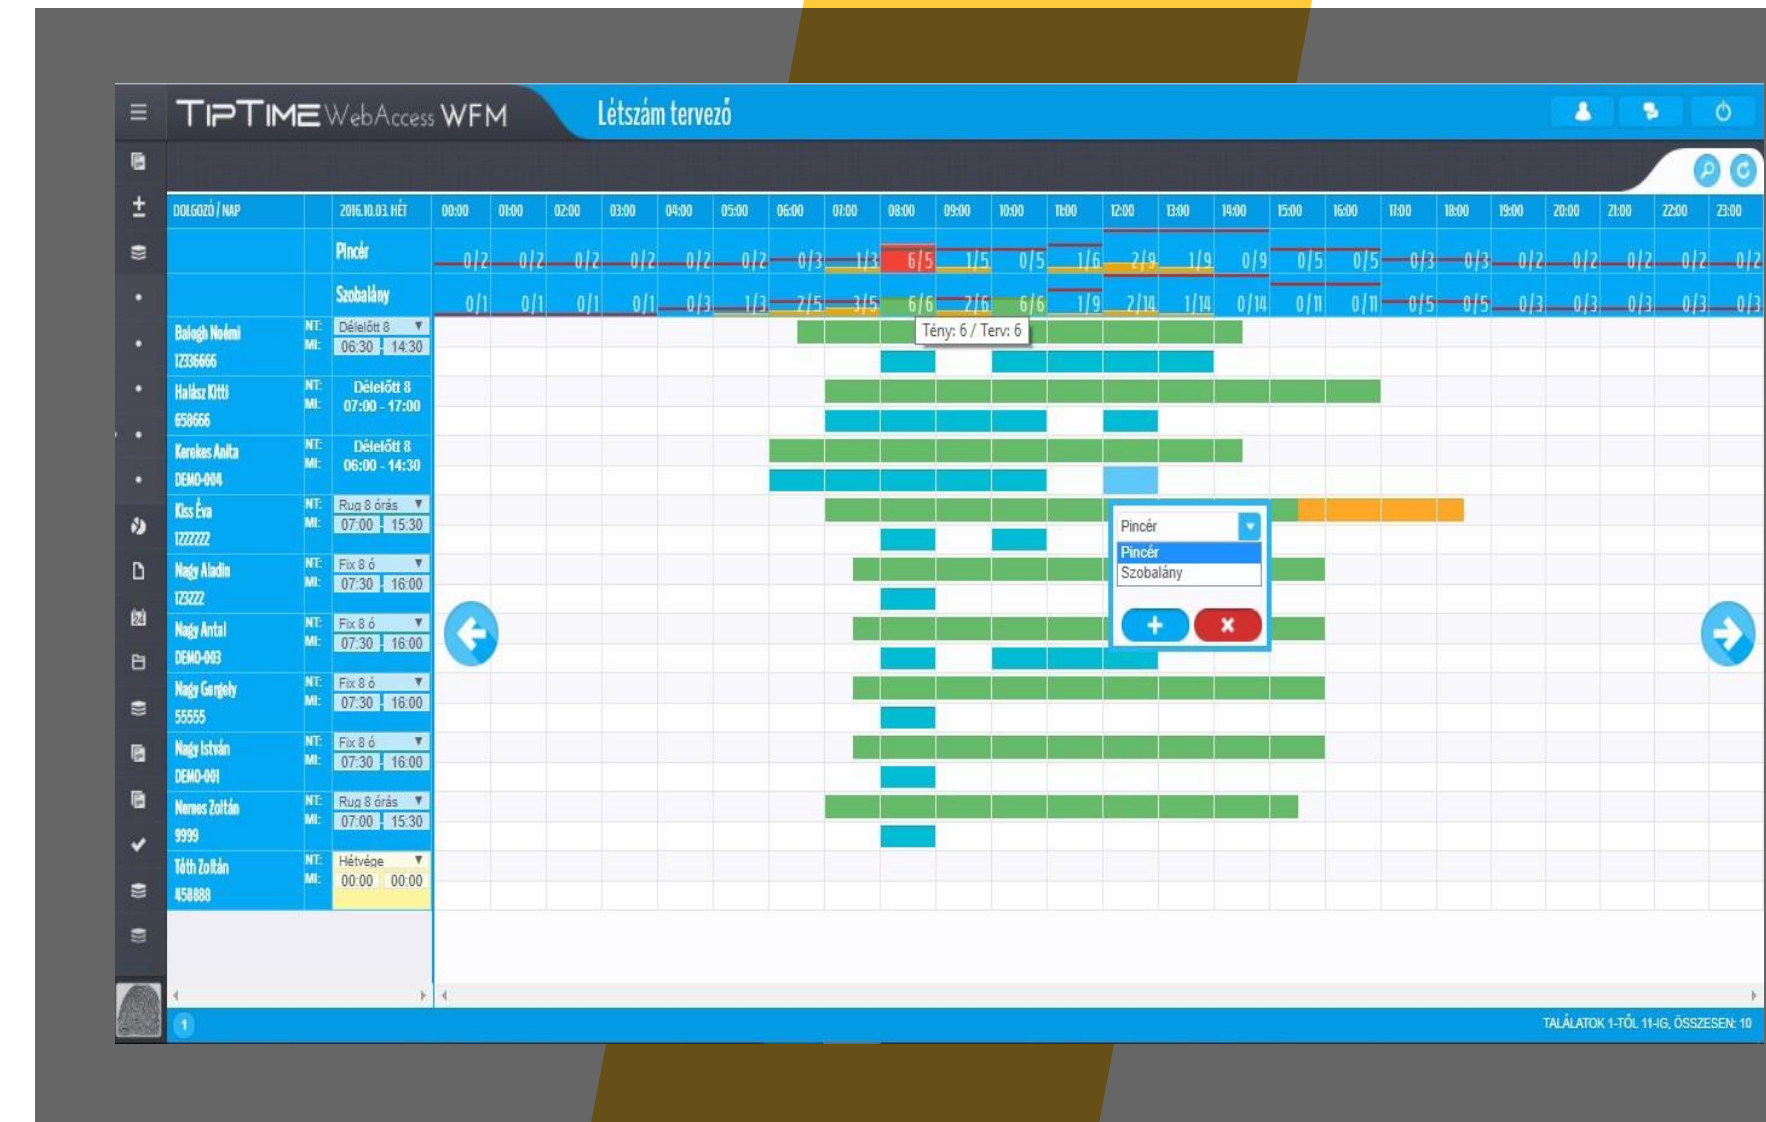

- Web-based reservation management
- Smartphone identification (NFC and QR Code)
- Integrable to any existing access control system
- Manages and stores visitor access permissions
- Entry information can be downloaded in multiple languages
- Interactive entry information and knowledge validity monitoring
- Simplified subcontractor entry
- Automatic alerts

EASE++ Shift

Competence and activity-based shift planning software

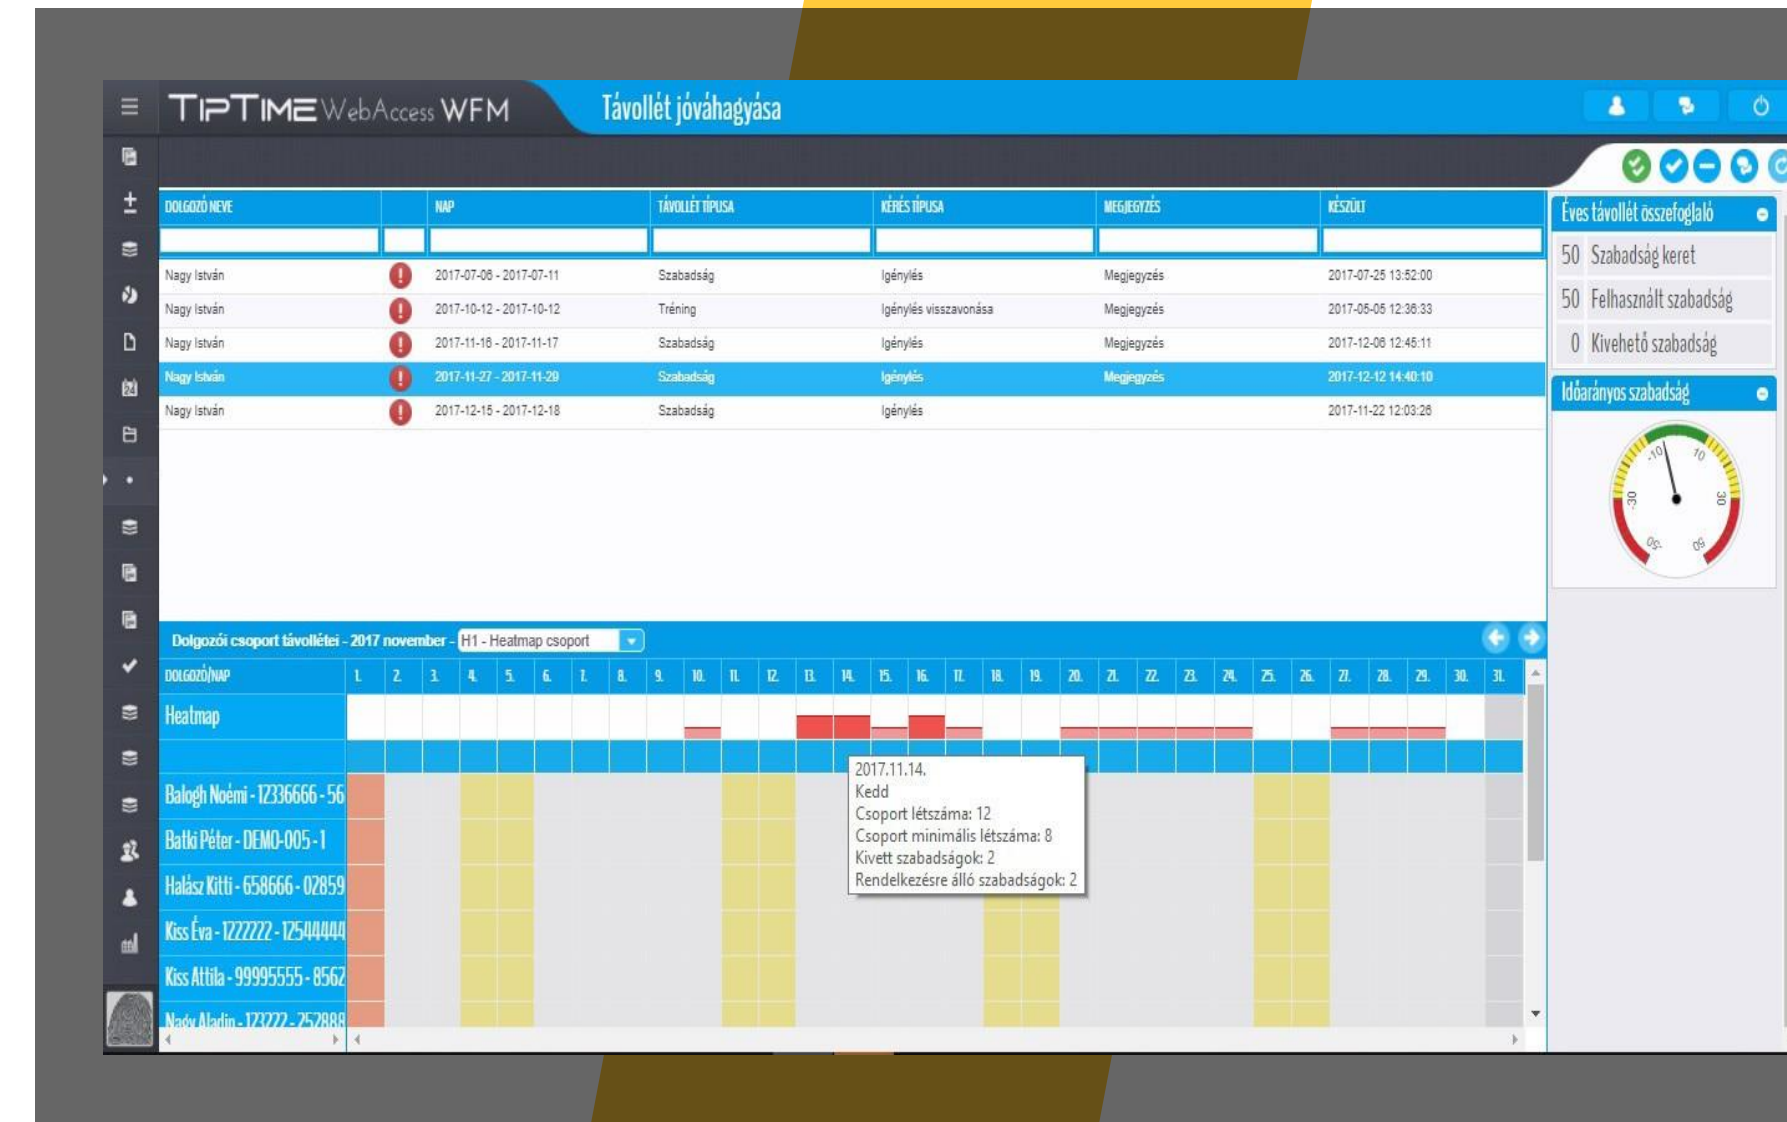

- Full rank shift planning with a few clicks
- Alerts about corporate interests, rules, and conditions
- Shift manpower can be planned within a 15-minute accuracy range
- Workers can be assigned and added to activities
- All information is traceable at the same time

EASE++ Access

Access control system management software

- Fully integrable with any HR, corporate management, security or access control system
- Alerts about location and time permissions
- Incoming guests and temporary cards can be managed in the gate module
- Full-scale, individually configurable permission management
- Compliance, audit, legal and data protection adequacy
- Responsive for unique development needs
- Extra features in the Advanced version (working suitability and shift conditions, processes – package check, alcohol and drug consumption – control)
