InDEx
Intelligent Data Exchange

You are visited every day by customers, partner companies or suppliers?

Removable storage devices are brought and connected – such as USB sticks or external hard drives?

That spells danger!

Without control over the removable media, viruses or malware can quickly infect your computer systems.
Especially in sensitive environments for example, industrial or critical infrastructures, development departments or research facilities this can lead to serious data loss – with incalculable economic consequences!

Here InDEx is the right solution. Your digital gatekeeper.

With InDEx the data stored on the USB storage devices brought in is checked and cleaned / disinfected before they are connected to your secure systems.
Companies – with infrastructures which need to be highly secure, like those mentioned above – face the challenge of always needing to provide up to date virus protection without an internet connection. This is possible with InDEx: the device is autonomous, uses state of the art methods and is always kept updated with the latest version.
InDEx offers you the possibility to monitor the data stream entering your infrastructure as well as outbound data.

Complete service package for your security

Benefit from long-term investment security and high availability. We offer InDEx in combination with an obligatory complete service package. Consisting of maintenance, monitoring, remote maintenance, patch management signature updates and on site exchange service.

Via our free 24/7 hotline we are available round the clock to provide instant support

Most importantly the service package goes even further than the standard legal warranty by enabling constant system stability and calculable maintenance costs.

Dashboard - everything in view

The InDEx dashboard offers you the ability to prepare, visualize and control important events, data and information at any time. You can access the checked and released data from outside the isolated environment and this in turn is downloadable via the InDEx dashboard

Features*

Hardware	
Touchscreen / resolution	10,1" / 26 cm / 16:9 TFT
Processor	Intel Atom N2930; 1,83GHz
Memory (RAM)	4 GB
Hard disc	32 GB SSD
Measurement w x h x d / weight	32 x 19 x 17 cm / 2,5 kg
Operating Voltage	110 - 230 V ~
Ports	
Front	1 x CFC-Slot 1 x SD-Slot (miniSD, microSD) 1 x USB 3.0 1 x USB 2.0
Back	1 x 24V Power supply 1 x USB 2.0 1 x USB 3.0 1 x LAN 1 x Power Switch
Others	
Protection class	IP 40
Theft protection	Kensignton Lock
