INTELLIGENT BUSINESS OPTIMIZATION LOGIC

Lower costs, more transparency and better service! When companies use software to optimize their business processes these are the goals. A suitable IT system must be able to quickly evaluate thousands of alternative decisions for complex operational challenges and to highlight the best possible solutions to the decision maker.

Standard IT systems are used to only manage and share information throughout a business. INFORM's optimization solutions complement these systems in specific areas. They support operational planning and logistics decisions in order to ensure that business processes are sequenced for maximum effectiveness.

Measurable Success

Optimized business processes give you a competitive advantage. Adding optimization components to standard IT systems reaps dividends which are actually measurable

- reduce costs
- increase productivity of staff employment
- better use of resource capacity
- improve stock control
- enhance customer service

Individual Turnkey Solutions

Our turnkey, individually configurable optimization systems enable you to adapt your business to ever changing markets. And we remain by your side, providing consulting, training and ongoing support as long as you require.

Made in Germany – Used Worldwide

Today, more than 750 employees with more than 30 nationalities provide support to well over 1,000 customers worldwide. INFORM makes employee satisfaction a priority, which results in clear business advantages such as:

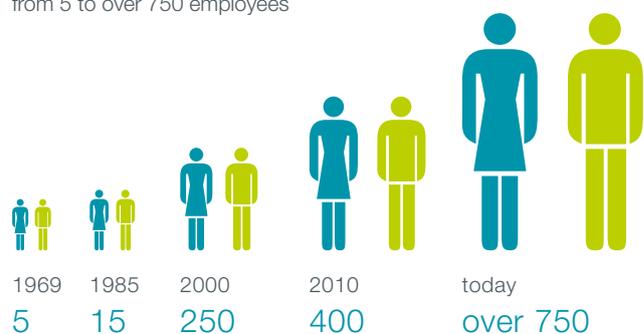

- Highly efficient software due to our experts' in-depth knowledge of the source code.
- Long-term partnership with our customers made possible by our low employee turnover.

INFORM AT A GLANCE
