

SAP S/4HANA

Get ready for SAP S/4HANA with ORBIS

S/4HANA is the key to a smart company!

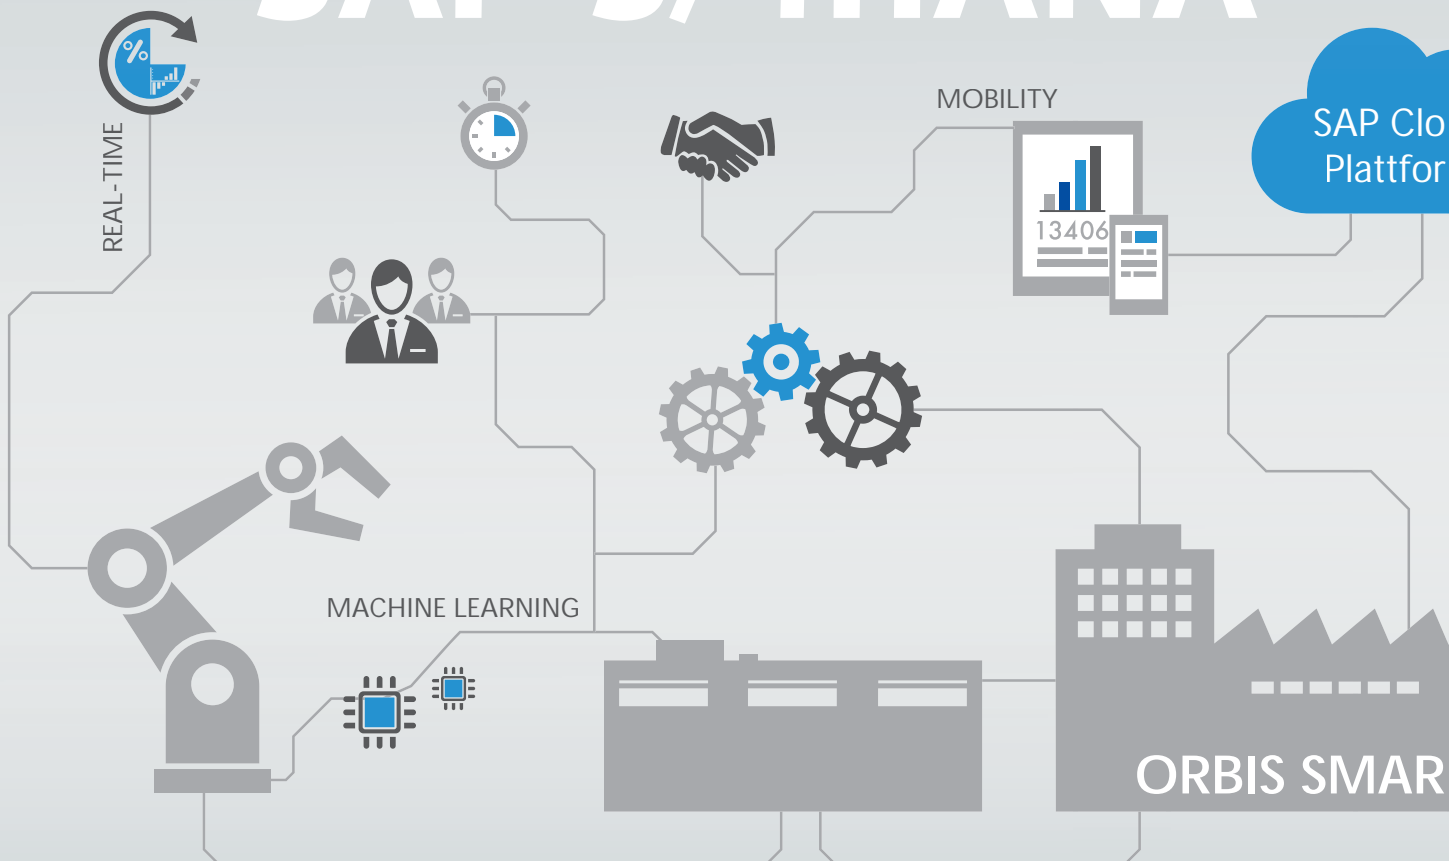

SAP S/4HANA enables companies of the future to keep pace with the demands of digitalization, reduce complexity and get on board with innovation quicker. The added value generated comes on the one hand in the form of the in-memory-database SAP HANA which enables both transactional as well as analytical functions, and the simplified user experience created by SAP Fiori.

What direct advantages will this offer your company?

The SAP S/4HANA Enterprise Management solution offers considerably increased performance. Batch jobs are now a thing of the past and even an MRP run can be executed several times a day. Business processes are networked in "real-time" and can thus be processed with ease. Whether it be planning, execution, forecasting or simulation, up-to-date business data can be

retrieved with immediate effect at any time, while the digital core enables "what if" scenarios. These embedded analytics can simplify decision-making processes significantly within transactions. Access to "real-time" data also increases employee productivity and improves the focus on value-creating activities. The new UX reduces the need for staff training while a break-down of processes into individual functions on the basis of roles adds to simplification. The display is fast and user-friendly and offers a user experience on every browser-capable terminal device. Users can choose which GUI they prefer. The new operating models (on-premises, cloud and a hybrid environment), enable SAP to offer an unprecedented level of flexibility. The integration of IoT devices and the analysis of these (big data) have been made significantly easier, functions which are available immediately depending on the operating model or with the aid of the SAP cloud platform.

SAP S/4HANA

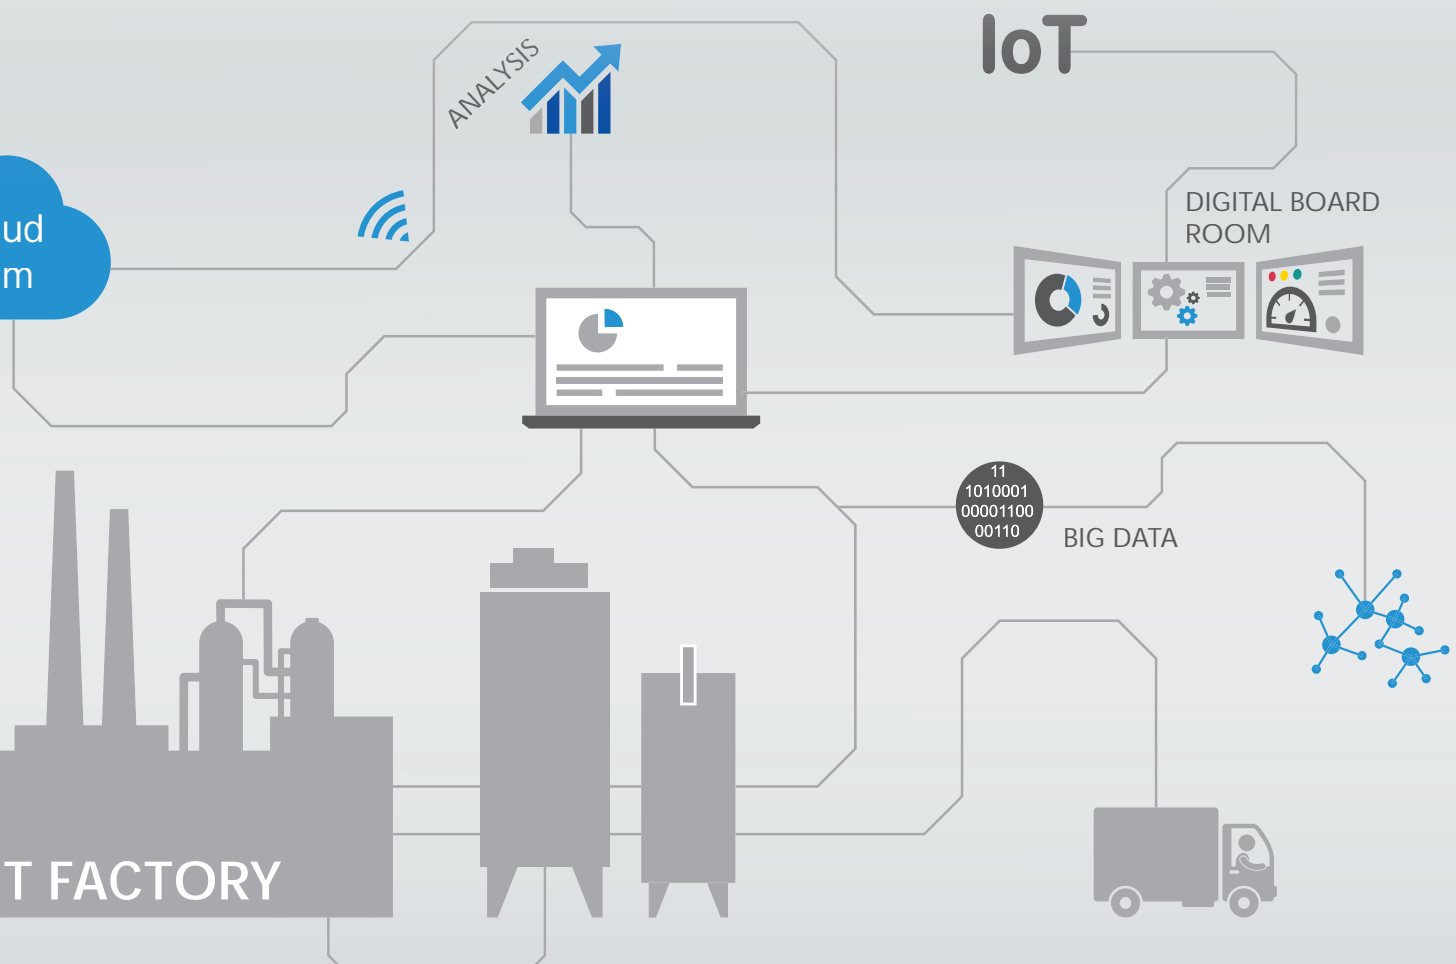

We will help you get ready for SAP S/4HANA

We are a well established SAP partner, offering holistic process competence for all business sectors and expert licensing advice from a single source – customized to the requirements of your company. We can boast more than 30 years SAP experience and are a strong partner for you when it comes to digitalization, which is one of our core competences. We have developed complete SAP integrated solutions that, combined with your digital factory, will turn your company into a smart business by automating, networking and visualizing processes in real-time – either step by step or all at once.

- Together with you, we will evaluate the new opportunities and challenges which present themselves on your journey towards SAP S/4HANA. Contact us now for more information.

More informations about SAP S/4HANA can be found in our webcast recording!

About ORBIS

ORBIS is an international software and business consulting company. With roughly 400 employees, ORBIS advises and supports international corporations and small and medium-sized enterprises in issues ranging from their IT strategy and the optimization of their business processes to system selection, system implementation and system integration. ORBIS uses solutions from the market leaders SAP and Microsoft, companies that ORBIS shares a close partnership with.

Our core competencies cover classic Enterprise Resource Planning (ERP), SAP S/4HANA, Supply Chain Management (SCM), Logistics Execution (EWM/LES), Manufacturing Execution Systems (MES), Variant Management, Customer Relationship Management (CRM), OnPremise and Cloud, Business Analytics (BI, EPM and data warehousing) and Product Lifecycle Management (PLM). ORBIS supports worldwide rollouts of ERP solutions and processes as a reliable partner. Own solutions for Industry 4.0, BI, MES, product costing and variant management as well as add-ons based on SAP complete our service portfolio. On the Microsoft Dynamics CRM platform, ORBIS offers sophisticated sector solutions and best practices that it has developed itself, such as SAP-integration.

Over 1500 successfully completed client projects are testimony to our many years of experience in the automotive supplier industry, construction supplier industry, electrical and electronics industry, machinery and plant manufacture, logistics, metal industry, consumer goods industry, trade and the pharmaceutical industry. ORBIS' long-standing customer base includes among others, Bosch, Eberspächer, Edscha, Hager Group, Heineken Switzerland, Hörmann, hülsta, HYDAC INTERNATIONAL, Jungheinrich, KSB, KUKA Roboter, Magna, Melitta Haushaltsprodukte, Modine, Paul Hartmann, Pilz, Rittal, Schott, SCHUNK, Villeroy & Boch, WAGO Kontakttechnik and the ZF Group.
