

This is what
the future looks like

BSP and ERP solutions from a single source

Cronon AG stands for visionary, smart strategic IT solutions. Both in the area of enterprise resource planning (ERP) and as an business service provider (BSP) we offer unique advantages for our clients and have the right approach to meet the requirements of medium-sized companies.

ERP solutions Complex and fast

■ ■ ■ CrononERP

In Cronon's ERP range you will find solutions which are specifically tailored to the requirements of your industry, can be individually adjusted and grow as you grow.

Enterprise resource planning (ERP)

From Infor LN through Infor Baan 5 to Infor Baan IV, Cronon is a reliable partner for ERP solutions, including through web services.

Infor ION, Infor CRM and Infor CPM

Corporate software that supplements and supports ERP solutions, including those from other providers.

Process optimisation with barcodes

Cronon optimises your operating procedures using mobile data collection. The right solution for this is called Infor Warehouse Mobility.

ECM integration and EASY ECM Suite

ECM integration using Cronon's ECM4LN interface as well as full project implementation for the EASY ECM Suite and other ECM solutions.

Database management

From licensing through tuning to monitoring, Cronon takes care of its clients' database systems as an ORACLE Platinum Partner.

Hardware and middleware

As an IBM Business Partner, Cronon provides a full range of hardware and middleware from the world's largest IT provider.

Business hosting and cloud

We offer our clients the service of operating their software solutions in one of the leading computer centres in Europe.

Together with you we implement software solutions that respond flexibly to current and future requirements.

EASY SOFTWARE

CrononBSP

Cronon BSP has around 20 years of operating and consultation experience in the areas of colocation, managed hosting and on-site installations.

BSP solutions

- For: virtualisation, storage, backup and cloud
- Cross-location IT concepts (high availability / geo-redundancy)
- Managed security (firewalls / load balancer / switches)
- Network management (WAN / LAN)
- High-availability connectivity services (dedicated line, dark fibre / DWDM)
- Solutions & PaaS such as website hosting, containers etc.

Additional services

- Purchasing solutions
- Licence consulting

Facts about the computer centre

- ISO 27001 TÜV certified
- Connection to various exchange nodes, for example DE-CIX direct connection
- Multiple redundant power supply, physically separated channels (fibre optic)
- 24 / 7 monitoring and supervision

We operate your server architecture in one of the **leading computer centres in Europe**. Almost unlimited availability and security of your data is provided in Berlin with our own state-of-the-art colocation space, through multiple redundant external connections.

You get the security of one of the most powerful computer centres in Europe, you save resources (for example your own server rooms) and your IT staff can concentrate on taking care of your core applications.
