

A black and white photograph of a city street at night. On the left is a curved glass skyscraper. In the center and right are several rectangular office buildings. The bottom of the image shows a busy street with light trails from cars and a few people. A large black rectangular box is overlaid on the left side of the image, containing white text.

This is what
the future looks like

Infrastructure as a Service

We will look after your IT infrastructure 24/7
and ensure that operating systems and hardware
are available at all times without disruption.

TÜV certified

Selected customers:

Cronon BSP has worked for almost 20 years gathering operating and consulting experience in colocation, managed hosting and installations for its customers.

BSP solutions

- For: Virtualisation, storage, backup and cloud
- Multi-site IT concepts (high availability / geo-redundancy)
- Managed security (firewalls / load balancer / switches)
- Network management (WAN / LAN)
- High availability for connectivity services (dedicated line, Dark Fibre / DWDM)
- Solutions & PaaS such as website hosting, containers, etc.

Additional services

- Procurement solutions
- License consulting

BSP data centre

We run your server architecture in one of **Europe's leading data centres**. Almost unlimited availability and security for your data is guaranteed in Berlin with our own state-of-the-art colocation centre and multiple redundant connections.

You enjoy the security that comes with one of the most powerful data centres in Europe and you save resources, for example by not requiring your own server rooms and allowing your IT staff to focus on looking after your core applications.
