

RELIABILITY

The first network dedicated to solutions and services for industry

Actemium is structured as an agile, self-learning network of more than 300 business units specialised by industrial segment to deliver customised solutions.

Multi-technical

Multi-site

Multi-country

Actemium delivers multi-technical, multi-site and multi-country solutions and services focused on the performance, optimisation and flexibility of both plant and equipment.

Safety, the focus of your sites and our expertise

Safety is an absolute priority and a prerequisite for everything we do. Our organisations operate under safety management guidelines that empower and encourage our teams to constantly strive for the only possible objective: Zero Accidents.

Our technicians, who are trained and authorised to work on sites in operation with strong safety requirements, remain on the alert throughout the whole work duration.

About VINCI Energies

In a world undergoing constant change, VINCI Energies focuses on connections, performance, energy efficiency and data to fast-track the rollout of new technologies and support two major changes: the digital transformation and the energy transition.

With their strong regional roots and agile organisational structure, VINCI Energies' business units boost the reliability, safety and efficiency of energy, transport and communication infrastructure, factories and buildings.

€10 billion revenue • 65,400 employees • 1,600 business units • 51 countries

Improving industrial performance

Solutions & Services for Industry

FLEXIBILITY

Addressing new challenges

In a world facing rapid technological change and new challenges, Actemium focuses on industrial processes. By its ability to accompany its customers in the optimisation of their industrial sites and to develop innovative solutions, Actemium responds to the challenges of the industry of tomorrow.

Close to you, all around the world

Actemium business units are located near the major production sites. Their flexible and responsive teams of experts are specialised by process to deliver outstanding expertise. At the same time, they work within the Actemium network to share their experience and knowledge and to continuously improve solutions and services in each area of activity.

OPTIMISATION

TRANSFORMATION

CUSTOMISATION

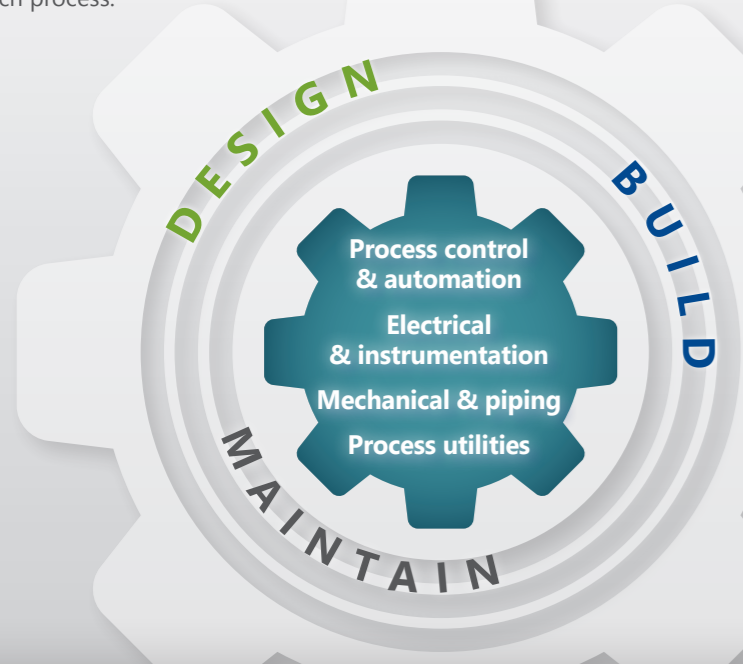

Customised solutions and services

Actemium delivers design, implementation and maintenance expertise across all industrial sectors.

Actemium's solutions and services – specific, comprehensive or turnkey – build on its in-depth familiarity with each process.

Covering the entire industrial life cycle

Across the entire industrial life cycle, Actemium implements a range of integrated, safe and sustainable solutions and services tailored to the specific needs of each customer.

Connect to the Factory of the Future

For Actemium, the future is already a reality. As a benchmark integrator, Actemium is a key player in the transformation to a smarter industry.

Innovative solutions

Enhanced safety, flexibility, traceability and productivity make industrial sites more efficient. Actemium innovates to provide long-term support for industrial development.

Actemium builds on innovative Factory of the Future technologies to continuously optimise its customers' performance.

Smart Process

Produce in a human-centered and connected industry

- ✦ Cobotics
- ✦ Non-Destructive Testing
- ✦ Additive manufacturing
- ✦ MES / traceability
- ✦ Virtual Reality / 3D Modeling

Smart Energy

Accelerate the energy transition for a sustainable and responsible industry

- ✦ Audit and systemic analysis
- ✦ Energy monitoring
- ✦ Energy optimisation
- ✦ Demand-Response
- ✦ Advice and financing solutions

Smart Maintenance

Manage production assets for an efficient and optimised industry

- ✦ Internet of Things
- ✦ Predictive maintenance
- ✦ Mobility tools
- ✦ Augmented Reality

Collective intelligence to serve every industry

Actemium networks its process expertise to deliver customised solutions and services. Its 80 expert clubs, each covering a market segment, solution, technology, customer or country, ensure regular exchange of information. This gives each customer the benefit of one-of-a-kind, specific expertise and the best solutions from around the world.
