From industry – for industry

Industry 4.0 Assessment – Preparing your company for Digitalization and Industry 4.0

Like many companies today, yours is probably faced with the following questions: How well are your production and its processes prepared for the digital transformation? Where do you currently stand as an organization? And how do you ensure that your employees are qualified to work in the approaching digital environment?

Our Industry 4.0 Assessment is the ideal tool to help you evaluate your company's Industry 4.0 maturity level and mark a starting point for your digitalization strategy. Together, we define which aspects of Industry 4.0 bring added value to your company and help you to achieve your objectives. Our detailed analysis provides a solid foundation for defining and building additional processes and projects to move forward in the digital transformation.

Advantages of our Assessment

Festo's own digital transformation allows you to benefit from our experience and solutions as a basis for this Assessment, in which we:

- Focus on various aspects – in-house/on-site – including technologies and production, as well as processes, employees, and culture
- Evaluate the expertise of different departments by conducting interviews with your experienced colleagues
- Provide transparency about your current maturity in digitalization and Industry 4.0
- Assist with defining your Industry 4.0 target state to further develop your company
- Recommend appropriate actions to achieve short-, medium-, and long-term objectives
- Evaluate your opportunities and risks in the implementation of Industry 4.0-related technologies
- Provide you, afterwards, with a detailed report from our experienced consultants, as well as additional recommendations for support
