Personal wiring assistant

# STEINHAUER eCAB PWA – The personal wiring assistant off the worker at his workplace

The STEINHAUER PWA is new and unique system to enlarge the productivity and give an additional drive to rationalize the processes in the classic panel building workshop.

STEINHAUER PWA (PWA means **P**ersonal **W**iring **A**ssistant) is a decentralize wiring workplace. The STEINHAUER PWA produces the wire required at the place where the worker needs it. The STEINHAUER PWA produces the wire in the individual needed length and could put a ferrule at the ends of the wire if required. Compared with a central solution (KOMAX, Schleuniger or Metzner) our system produces the wire „just in time“ and visualized the way / route of the wire in the electric cabinet. The worker does not obligatory reads a wiring plan.

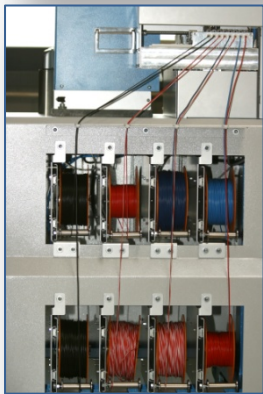

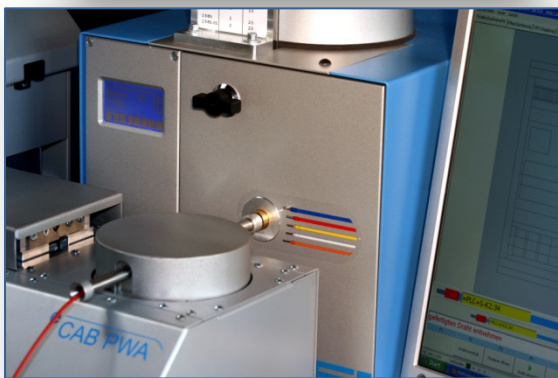

The benefit and the features of the STEINHAUER PWA at a look:

- **It shortens the wiring time by 30 to 40%**
- **Cost optimisation and quality improvement**
- **Decentralize system, The PWA will be where you need him and he is required**
- **Quick return on invest**
- **Seamless integration into your CAD-system**
- **Developed to fits the needs of the unique item and series manufacturing**
- **Automatic wiring production even with only one worker in the workshop**
- **Wiring changer with a magazine of 8 different wires – for maximum flexibility**
- **Integrated label system**

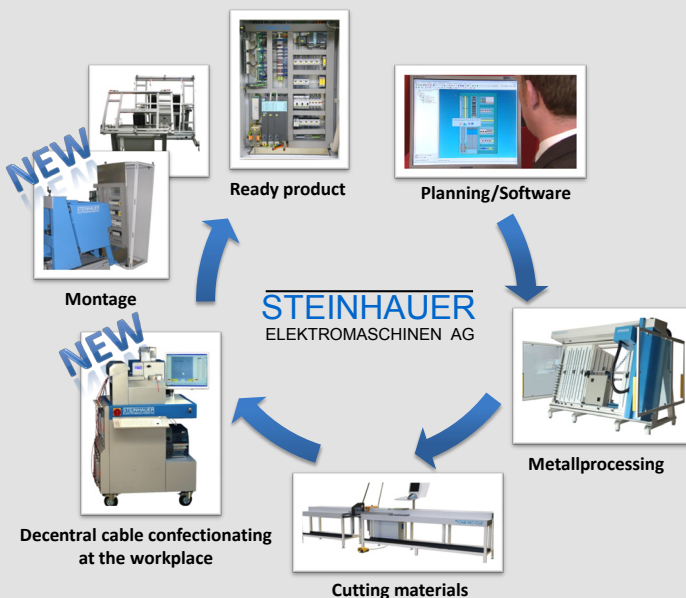

The STEINHAUER PWA is capable to put ferrules on single wires from 0,5 up to 2,5 mm<sup>2</sup> . An optional module allows to length larger profiles up to 10 mm<sup>2</sup> incl. labeling and visualization.

The STEINHAUER PWA could be smoothly integrated into electrical CAD programs with routing capabilities as ePLAN Cabinet, HOS ELSCHRANK and so on.

The STEINHAUER PWA will close up the circle from the planning up to the montage. The STEINHAUER Elektromaschinen AG is the first system supplier who has solutions for all parts of the panel building shop who could be supported by a machine.

STEINHAUER is the most innovative system supplier of solutions for panel builders
