

visual shop floor

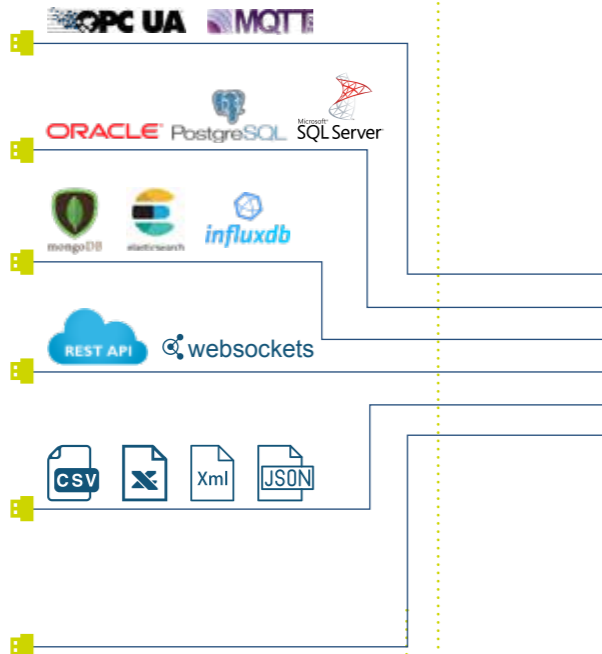

With dynamic
data management
for smarter production
for the future

by **solunio**

YOUR SYSTEMS

CONNECTORS

visual shop floor

1 COLLECTING DATA

Connect to your data sources through multiple existing connectors and, if needed, add your custom connector.

2 DATA PREPARATION

Link, filter and clean up your data and define key figures.

SMART LAYOUT

MONITORING

INFO BOARD

3 UTILIZE THE INFORMATION

Use real-time data and historical data to optimize your production processes.

APPLICATION EXAMPLES

Optimize your production processes with the right information in the right place at the right time.

Recording Process Data
Record your process data and detect deviations early.

OEE Evaluation
Monitor the effectiveness of your plant and identify optimization potential which can be easily used.

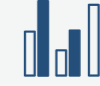

Mobile Access
Maintain a constant overview. Access the most important information at any time, even when you are on the road.

Resource Planning for Maintenance
Efficiently schedule preventive maintenance and integrate it without disturbing the ongoing production.

Strategic Development
Recording your data over a long period of time builds the basis for optimizing your production processes.

Target versus Actual Performance
Constant access to target versus actual performance enables you to intervene quickly to possible discrepancies.

Get Warnings
You will be informed of problems and variations at an early stage thus enabling you to take action in time.

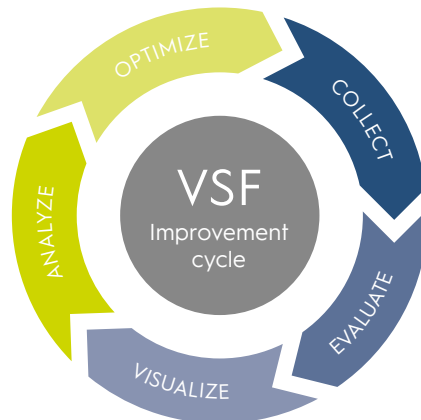

Team Meeting
Provide a consistent overview of your production for the whole team thus enabling structured processes.

ADVANTAGES OF VISUAL SHOP FLOOR

VISUAL SHOP FLOOR collects all relevant production data in a central point creating the basis for data analyzation and optimization of your production processes.

- ✓ Sustainably improve **resource utilization**
- ✓ **Visualize** production data simply and intuitively in real time
- ✓ **Use information** in order to detect risks early and solve problems quickly
- ✓ **Access** to all relevant information both from stationary workstations and **mobile devices**
- ✓ **Independent management** and configuration of the whole system
- ✓ **Transparence** for the whole team: from operator to production manager to top management

With „Visual Shop Floor Improvement Cycle“ optimize production step by step.
