

Solw'IT | Embedded Systems

EMBEDDED SOFTWARE DEVELOPMENT & MAINTENANCE SERVICES
PROFESSIONAL EMBEDDED ENGINEERING TEAM @ YOUR DISPOSAL

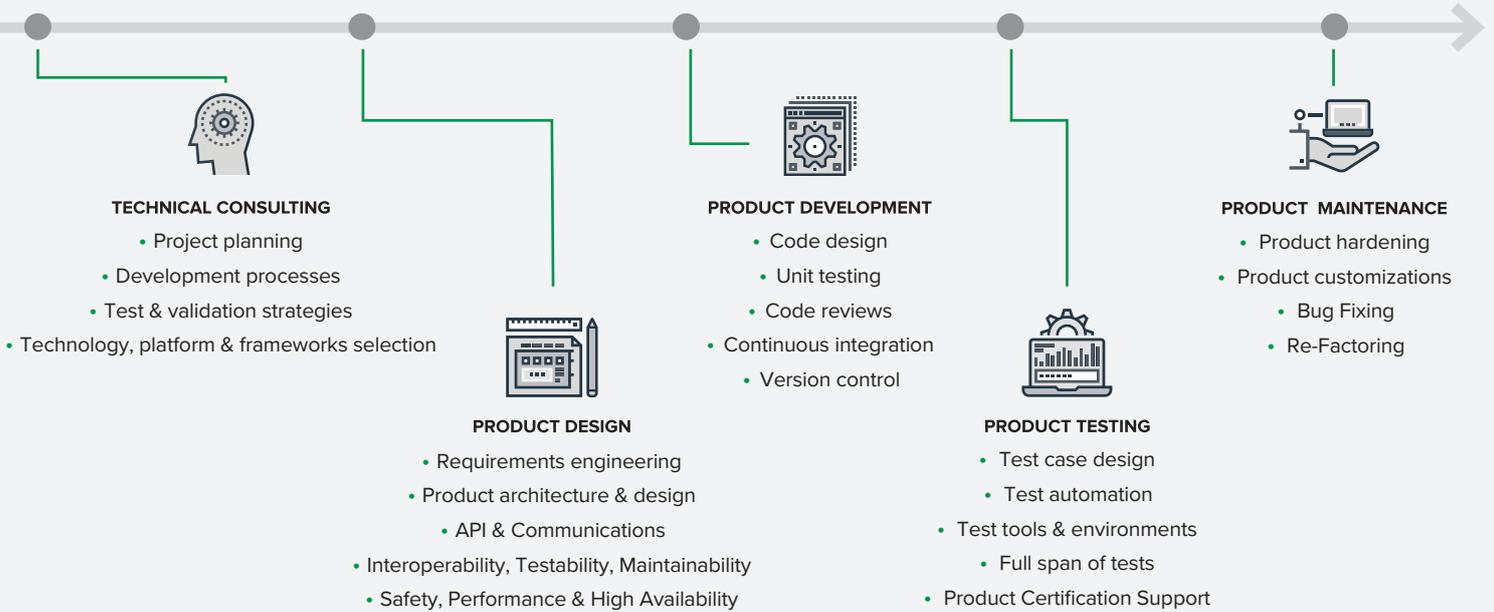

Strategic, long term contribution to

- Your Customers' Experience
- Your Competitive Advantage
- Your Product Line Excellence

Our Clients

- Transport & Automotive
- Computing hardware vendors
- Telecommunications equipment vendors
- IoT, Intelligent devices vendors

Solution for each & every stage of Software Development/Product Life Cycle:

Your benefits

Choose Solwit

- Outsourced solution, easy fitting to your organization structure and strategy
- Deep, diverse technical expertise and scalable resources
- Outsourced process: your staff can focus on overall product aspects
- Outsourced team: scaling to your needs and budget
- Cost effective and agile way of implementing innovations in your product line
- Improved Time-to-Market of your products or services

Let's Solve IT

- Design for industry standards, safety, performance and testability
- Mission critical applications
- Technology and solution architecture right for the challenge
- Easy product certifications
- Focus on total cost of ownership (TCO) throughout entire product lifecycle
- Long-term quality through professional, independent and continuous testing process

Industrial standards compliance Python Modbus over
