

**Contour Advanced
Systems for complete
system solutions**

System Supplier and System Integrator

Contour Advanced Systems is primarily active in High-Tech projects, modules and systems in the private and public sector. The broad range of products can be characterized by products which require a combination of the following competences during the engineering and construction phases: mechatronics, energy, climate technology, data communication and sheet metal engineering. On request, Supply Chain and Project Management will be taken care by Contour.

**Contour translates
knowledge, innovation
and craftsmanship in
the best solutions**

We create surprising solutions in product development, engineering, complete production and assembly of modules and systems. Complemented with worldwide logistic service delivery. When applicable, including the required or requested tests and complete installation on-site. Our added value enables you being focused on your business.

Electronic Modules

Contour Electronic Modules is a specialist in mechatronic components, cable assemblies and modules in de high-mix low volume industrial and private market. Based on its core competences engineering, production, testing and assembly Contour realizes products for R&D, Prototyping, small and medium sized series for High Tech markets such as Semicon, Opto-electronics, Healthcare and Agriculture-Food according to the latest technical standards. If required including cleaning, cleanroom assembly & packaging and full traceability.

**Developing knowledge
of product and processes
at the start of the design**

The product portfolio consists of special cables and cable assemblies, wiring harnesses, shielding & interference solutions and electronic control units, mainly for the high tech machine building industry. Next to internal quality assurance systems Contour also has a ISO 9001-2008 certification even as the US Federal Approval, a certificate that allows Contour to deliver international Defense orders. To meet customer demands, often OEM's, Contour also is awarded with the QLTC certificate.

**Added value supplier and partner
for precision sheet metal, mechatronic
modules and complete systems**

*Excel in our
core business*

Contour Group

Contour Group is an added value supplier for specialized sheet metal, mechatronic solutions and High-Tech projects for the industrial and public market. Partner in business mostly OEM's, in the high mix- low volume market during the entire product life cycle.

Collaboration is key item

Cooperation with our customers from scratch to achieve the best possible solution. Collaboration, from product creation to product realization, with supporting logistic services, assembly, service and maintenance. Though product development often is part of the complete process, we also manufacture based on customer specifications; as well for small and medium sized series and for projects.

Innovative

Contour aims to keep her competences up to date to be able to continue the partnerships with her customers in the future. This is why Contour continually invests in knowledge, craftsmanship, systems, production and assembly facilities, automation and ICT. We aim to continually improve our organization. Innovatively pursuing the best solutions for our customers, directly adding value in their markets.

*Create surprising
solutions for
your succes*

*Excel in design,
sustainability
and quality with a
competitive price level*

*For Contour,
quality is not
department.
It is a mindset*

Market oriented

By applying our market knowledge and experience, we aim to create ideas and solutions in order to create customer value. Both flexibility and total cost of ownership, play an important part in this strategy. Just as the shorter time to market and shorter lifecycle. We're used to collaborating with our customers based on an open culture of mutual trust, enabling us to act as the best imaginable partner.

Attention for Quality

Contour pays a lot of attention to quality and continuous improvement what is supported by investing in techniques and processes but certainly in our employees. Of course Contour is certified for several quality management systems including ISO 9001 and AQAP 2010.

Sustainability

It is the goal of Contour to take the important values of People, Planet and Profit into account in all of its activities. We aim to create a safe and healthy working environment for our employees. Whenever possible, we take future re-use of materials into account. Waste is separated and operations having a negative impact on the environment are limited to an absolute minimum. All investments support this strategy even as the ISO 14001 certificate.

*Sheet metal working
still is craftsmanship*

*Specialist in sheet
metal during the
entire product life cycle*

Precision sheet metal

Contour Covering Technology is the center of excellence for sheet metal. The newest technologies, machinery and craftsmanship, and also years of experience with a broad variety of materials, markets, and technical possibilities, guarantee our ability to deliver an optimal solution in sheet metal. Contour permanently invests in automation for constantly high quality and market-based prices. Production facilities are equipped for prototyping, projects and medium size series.

The products we manufacture primarily consist of sheet metal, usually with a material thickness ranging from 0.3 to 5 mm. These products are applied in High-Tech surroundings. System Supplier, from design to logistical services, with a clear focus on machinery covers, frames, cabinets, parts and electro-mechanical assemblies. Being innovative as a partner and create added value to our customers.
