

## Unbrako fasteners

1. Greater strength by exactly shaped head.
2. Knurled for convenient mounting.
3. Higher resistance to changing load.
4. Improved resistance to fatigue fractures.
5. Maximum strength without brittleness.
6. Accurate hexagon for high torque.
7. Total traceability by unique E-CODE.
8. Material U130, stronger than 12.9.

## Largest Unbrako stock in Europe

Jeveka has been a reliable partner of Unbrako since 1946. We carry the largest Unbrako stock in Europe.

## Durlok 12.9 self-locking

- Does not loosen in severe vibration.
- No marks in your products.
- Applicable up to 300 °C.
- Reusability is guaranteed with locking ability maintained.

The Durlok fastener system by Unbrako is effective on a wide variety of engineering materials including steel, cast irons, non-ferrous metals and sheet materials. These heavy duty bolts can be used for all joints subjected to high loads, such as in automotive engines, transmission units, vibratory feeders, agriculture machinery, percussion drilling tools, etc. etc.
