Welcome to a place where business and research is at the forefront of what we know today. Develop the products of the next generation and take them fast and efficient to market. Join in on cutting edge research and business.

Our job is to assist You in finding the best possible opportunities for You and Your business. The enterprise structures of the region and our university pushes the boundaries of development on a daily basis, our long experience and know-how in advanced manufacturing combined with the best logistic site of the Nordics, makes our and thereby also Your business case a strong and compelling case.

Örebro region is highly competitive and we host international manufacturers that have kept their DNA in constant change and the adaption of new technology, innovation and constant improvement in productivity and production.

We would love to have You join us!

We offer you a one stop shop

In our region you will find everything that you need to set up, develop and run your business. Materials, product development, production and logistics are all available here and core of what we do. Our actors collaborate closely with the university and with each other in order to excel at what they do.

We can provide excellent conditions for industrial AI and robotics connected to one of the finest research labs in the country. Researchers are ready for your challenges.

Also we can provide great greenfield and a chain of subcontractors who always are on the hunt for new collaborations and actors to strengthen the industrial landscape.

A stylized map of Sweden in shades of purple and blue. A red location pin is placed in the central part of the country, specifically in the Örebro region. A white speech bubble with a red arrow points from the text below towards the pin.

Why
Örebro
region?

“Örebro is a logistical hub which is perfect for us as we are about to grow into the Nordics and the Baltics”

Pontus Glasberg, Swedol, Head of Logistics

Center of the Nordics
