

## About Us

Linqing Xinke Precision Machinery Co., Ltd. founded in 2009. It covers an area of 37,000 square meters, the assets of 17 million yuan. Products using the investment casting process and silica sol water glass two processes of production, quality precision can reach CT5 ~ 7 level set precision casting and machining. Casting and annual production of more than 2,000 tons of finished parts.

The company is located in the canal city of Linqing, the Beijing-Kowloon Railway runs through , three kilometers away from the Xing Gao high speed. The company engaged in the production of carbon steel, ductile iron, steel, wear-resistant steel and other materials casting, covering automobiles, ships, high-speed trains, construction machinery, machine manufacturing, mining machinery, hardware tools, paper and other industries. The major products for the FAW Group, SAIC, United States Jimmy Carter, Great Wall Motor, Nanjing Iveco, JAC, Russia locomotives and other companies supporting. Company fully implement ISO 9001: 2008 quality management system. Internal control testing equipment, production processes used ng OES, molten steel thermometer, microscope, Brinell hardness and other complete sets of testing equipment, the company also has a well-equipped chemical and physical properties of laboratory experiments, effective control of chemical composition, mechanical properties guaranteed. Good product quality to win the trust of customers. The company has a sound mechanical processing capacity, equipment machining centers, CNC lathes, grinders, milling machines, line cutting, high-frequency quenching.

Companies adhere to the "people-oriented, quality Liye, customer satisfaction, continuous improvement," the quality, Wang Tao, general manager of welcome people to come to negotiate business letter, sincere cooperation and seek common development.
