

## Company Profile

*Clust-ER Mech is a private association among companies, research centres and training institutions. Members share skills, ideas and resources to support the competitiveness of the mechatronics and automotive sector in the Emilia-Romagna Region.*

*This territory has a historic vocation and industrial tradition in the Auto and Motoristic: from this came the definition of "Motor Valley", a reality that encompasses all the industrial experiences in the sector. The presence of leading companies in their respective segments means that at the regional level research and industrial innovation capacities are aligned with the most advanced solutions developed worldwide.*

*This vocation has also allowed the creation of similar sectors, which, although limited in territorial extension and turnover, present peaks of excellence in terms of technology and quality of the products, namely Nautical, Aeronautics, Space, Fluid Power, etc.*

*Clust-ER Mech associates about 80 members from Large Corporate like Sacmi, Bonfiglioli, Arbos Group, SCM Group and Bucci automations to small but highly innovative manufacturers. Moreover the research side of the association includes laboratories of the regional universities and several private ones contributing to enrich the value of the Cluster in the research and innovation field. The association aims to create synergies between the different actors to trigger the Region to reach ever higher peaks of innovation.*
