Web client: HTML5, CSS3, Javascript, jQuery, AngularJS, Bootstrap

BIG DATA

Our engineers are experts in leveraging Big Data.

- Big Data Strategy and Architecture for both structured and unstructured data
- Machine learning and advanced algorithms
- Real time data analytics – intelligent systems design

TECHNOLOGIES

Relational Databases: Microsoft SQL, PostgreSQL, MySQL, Oracle NoSQL: MongoDB, Cassandra, Redis, Messaging brokers: ActiveMQ, MSMQ, ZeroMQ, RabbitMQ Big Data & Datawarehouse: Hadoop, Spark, Hive, Microsoft Analysis Services

ZYNK
Mobile apps. *Web*. **Big Data**

ZYNK's deep expertise in mobile and Web applications has helped us to build a secure and reliable payment processing and voucher system that is at the heart of our business model. I have warmly recommended ZYNK to friends, and have always had delighted and thankful feedback from them too. you!

Patrick Weissert, CEO Gymtixx

The team at ZYNK have exceeded our expectations in every way and enabled us to develop an outstanding application. We asked them to develop a highly scalable, low latency, messaging platform with a cutting-edge, consumer facing, app. This required a rare blend of deep technical expertise, user experience design skills and social app business knowledge that we have never found before with an offshore development team. They have proven to be an invaluable partner who have added real value to our business.

Peter Vines, Symmetric Transactions AG

ZYNK was recommended to me when our company was evaluating partners for developing our complex product ecosystem. Three aspects made our collaboration with ZYNK a real win: Firstly I was very impressed how Gheorghe and his team jumped on the project and where ready to tackle all given challenges with speed and quality. Secondly the diversity of skills offered by ZYNK was an invaluable efficiency gain. Architecture consultancy, backend- as well as frontend development came out of one hand which was a consistent answers and solutions. Finally the ZYNK-team stood out with comfortably collaborating in our international project environment with our team members in various locations. They're tireless effort to over-deliver made a real difference in our product. A big THANKS to Gheorghe and his team at ZYNK.

Markus Ludemann, CEO figo Gmbh
