

Matrix Gemini LIMS

The User Friendly LIMS designed for change

Laboratories need to manage large volumes of data including samples, tests, results and associated files according to strict standards. The Matrix Gemini™ LIMS (Laboratory Information Management System) is designed to meet these demanding needs and yet be easily configurable by Autoscribe or by the user to keep in step with evolving laboratory needs & working practices.

Matrix Gemini LIMS - dual desktop and web browser interfaces

Key Features

- Designed for change – configuration tools have a simple to use graphical user interface (GUI) allowing you to update your system at anytime; no coding skills needed
- Intuitive – It's simple to change terminology and workflows in the LIMS to suit the way you work. This makes it easy for staff to adopt, reduces the training effort and avoids costly errors in the laboratory
- Easy user adoption - web or desktop interfaces scale from single user to world-wide multi-site deployments
- Achieve compliance with ease - complete audit trail and built-in change management enable compliance to international standards, e.g. ISO17025, GMP, FDA 21CFR Part11, GLP
- Open standards - Link to Instrumentation, ERP and other business systems to speed up sample throughput and reporting via automation
- Easily supported - All customers use identical software. Customer configuration changes supported by Autoscribe at no extra cost. Screen designs are version controlled (i.e. can go back to earlier versions)
- Longer system lifetime - Ease of configuration leads to lower cost of ownership & excellent return on investment (ROI)

A Modern 21st Century LIMS

“Connect whichever way is easier for you. Out of your lab today? Use the web. Back in the lab tomorrow? Use your desktop client.”

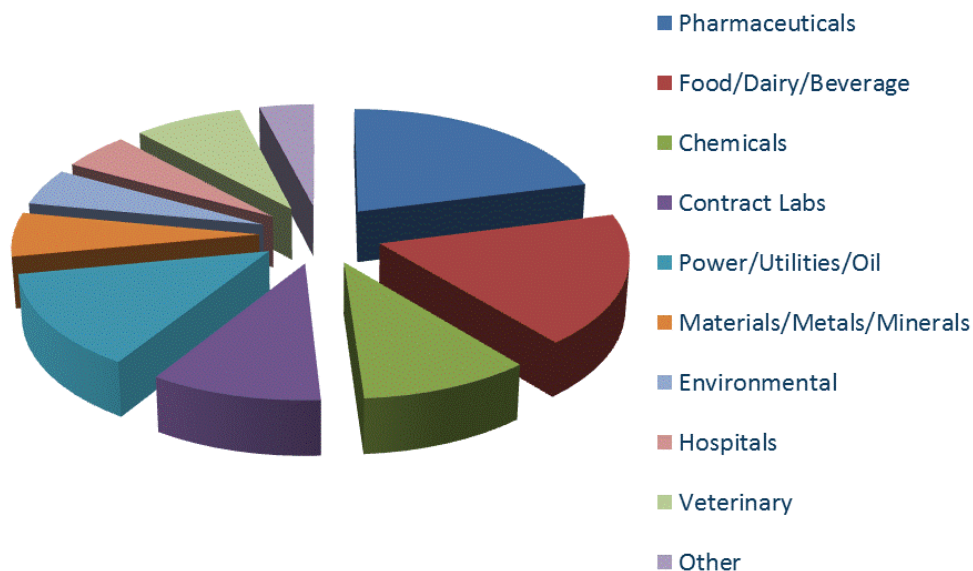

Matrix Gemini LIMS is unequalled in its configuration flexibility. Easy to use configuration tools allow you free choice to change any workflows, screens or menus, and to capture any customer specific data exactly as you want. What's more no coding skills are required as the configuration tools have a simple to use graphical interface that allow you to make any changes you want. This makes Matrix Gemini LIMS the most configurable future-proof LIMS on the market.

“Matrix Gemini LIMS can be precisely configured to meet your exact business needs.”

“Configuration changes are easy to make to keep the system in line with changing requirements”

“Matrix Gemini LIMS scales to meet the needs of both small labs and global organisations”

Market Distribution

Matrix Gemini LIMS is suitable for a wide variety of industries
