

iLIMS

The configurable
laboratory information- and
management system

**Quick implementation via precast
industry modules**

**Complete adaptation to your processes through
customizing without individual programming**

Support of GMP, FDA, etc.

 **INTEGRIS**

iNNOVATIV

Since 2003 we take care of many customers from different industries to improve their lab processes. Two of our renowned clients are EnBW and OSRAM.

Our main priority is the practical guidance of our customers. Therefore, we employ people as project managers with great experience within the laboratory working field.

With our preconfigured solutions for different industries we offer a shortened time of implementation. At the same time we guarantee a very flexible system and an individually adapted solution for any customer.

With iLIMS we offer you security for the future with state-of-the-art technology on an open and modern platform.

iNDIVIDUELL

Of course we are well-informed about the key topics and see the knowledge of our customers' demands within their industries as the base for any efficient solution. The following central issues have been selected together with our customers.

Challenge:

Customers expect quick electronic results according to their specifications.

Our Solutions:

- Fast adaption to the client requirements without additional programming
- Consistent solutions for all processes reduces manual efforts
- Modern technology enables us to allocate selected data online or for mobile usage
- By using professional data banks, like MS SQL Server or Oracle, disproportional amounts of data are no problem
- Audit reports are automatically generated with the customers layout and being sent off as required by email, fax or mail

iNTEGRiERT

iLIMS is more than a sample and laboratory management. With ERP-modules we install a fully integrated system solution, including all departments like sales, lab and finance without interfaces or double data keeping.

Our system offers you the liberty of deciding for yourself what competencies have the highest importance for your laboratory.

Extend your LIMS with the following modules:

- Sales and distribution (CRM, sales)
- Purchasing (orders, invoice verification)
- Financial management
- Stock and material administration
- Project management
- Documents management

SECTOR SOLUTION

In-house Laboratorie

The requirements for in-house labs are covered with iLIMS basis. The optimized and quick compilation of measurements is the main demand of in-house labs. Provided data does not come from an interface, iLIMS supports the data gathering by a unique pivot function. This pivot function generates order recognition masks according to the scope of parameters.

Recommended additional modules:

multi-level release, testing agents, facilities and points of withdrawal, DMS

Contract Laboratories

The use of a customer-relation-management-system has immense importance for any contract lab. From customer acquisition to invoicing, all administration processes are guided with a unified system. This stands for real cost-effectiveness.

Recommended additional modules:

control charts, CRM, Sales, DMS

Research Laboratories

The key issue of any research is aiming for a technical result and not making profit. The difference to all other lab types - the experiment is the main focus of all processes.

Recommended additional modules:

experiment order, project management, material administration, DMS

iLIMS solution for RND

Planning:

- Project administration by an extensive project management
- Communication via email is included
- Administration of sponsors, organizations and coworkers

Organization:

- The whole experiment is mapped in one module
- Each step is documented
- Literature is connected to the belonging experiment

Data Logging:

- Interface to any instrument in your lab
- Automated organization of the monitored data
- High ergonomic logging schemes for manual data logging

Analysis:

- Integrated data analysis tool
- Data export for external tools (Origin, MS Excel)
- Data import of pictures and data files
