## ARMINIUS rebate profile head

For either a door or window rebate, the ARMINIUS rebate sanding tool is ideal for sanding all kinds of rebate style profiles. Even 90° profiles or sharp profiles can be sand with the profile abrasives to eliminate manual hand sanding .

## ARMINIUS sanding tools for decorative groove

The sanding tools for decorative groove allows you to sand decorative ornamental profiles and V-grooves without problems. ARMINIUS guarantees the profile accuracy of +/- 0.05 mm, to precisely sand the complete profile. The Base tool can be equipped with variable profile shapes. This tool will sand many meters of material giving the optimal life.

## APPLICATION EXAMPLES

# ARMINIUS Profile sanding Tool For Raised Panel Doors

The ARMINIUS sanding tool for raised panel doors is available in nearly any dimensions. Manual sanding is particularly time-consuming, which makes the ARMINIUS sanding tool for raised door panels one of the most economical tools.

## ARMINIUS sanding segments

The segment strips and the single-segments guarantee the user a quick exchange of the abrasive. This saves time and money.

### YOUR BENEFITS

All profiles could be sanded with one tool

Quick and easy exchange of profiles

Cost savings through the standard profile program

Can be designed for many diameters and heights

Designed for long abrasive life

Can be used for small or large door applications

Available in shank or Bore style tools

Abrasives in 3 price categories for different requirements

No readjustment after changing the abrasive

Can be used on different machines
