ARMINIUS BASIC-Line profile sanding tooling system

Professional profile sanding systems available at a price to suit the cabinet shop budget.

In a variable design for use as a cost-efficient tool for table top-, CNC-, throughfeed machines and automatic moulders in cabinet shops and - with relevant equipment - for industrial operations.

Sanding rings for edges with downhold plate

Sanding rings, segments or segment rings with S2 universal flank protection.

Sanding rings for raised panels on the BASIC platform

3 x 3 qualities for 3 x 3 cost and performance requirements:

For fitting with individual segments capable of working with three different basic systems:

- B1:** with fully profiled basic profile rubber
- B2:** with Unibase basic profile rubber
- B3:** without basic profile rubber

For fitting with 3 abrasive qualities:

- A1:** Opticover
- A2:** Softblend
- A3:** Easyblend

Permits substantially higher footage, i.e. lower abrasive consumption with a level surface finish over long sanding distances.

Your benefits:

- An all in one base disk can be used for the edges, panels and custom mouldings to suit your needs
- A 3-step modular system allows new-comers to enter into this technology at an attractive price point
- Thanks to the use of durable plastic components manufactured cost-effectively on an industrial scale
- Almost all of the current standard and custom profiled abrasives can be used on the basic design
- A viable option for low volume production, perfect for kitchen at a time application
- Economical profile shaping and sanding of batch sizes as low as one
- Internationally available with on line ordering, with commitment to your tooling supplier for a package deal
- Basic-Line kicks at an open door
