## ARMINIUS UNI-Line profile sanding tooling system

Universal sanding tool with combination facility for all profile sanding requirements.

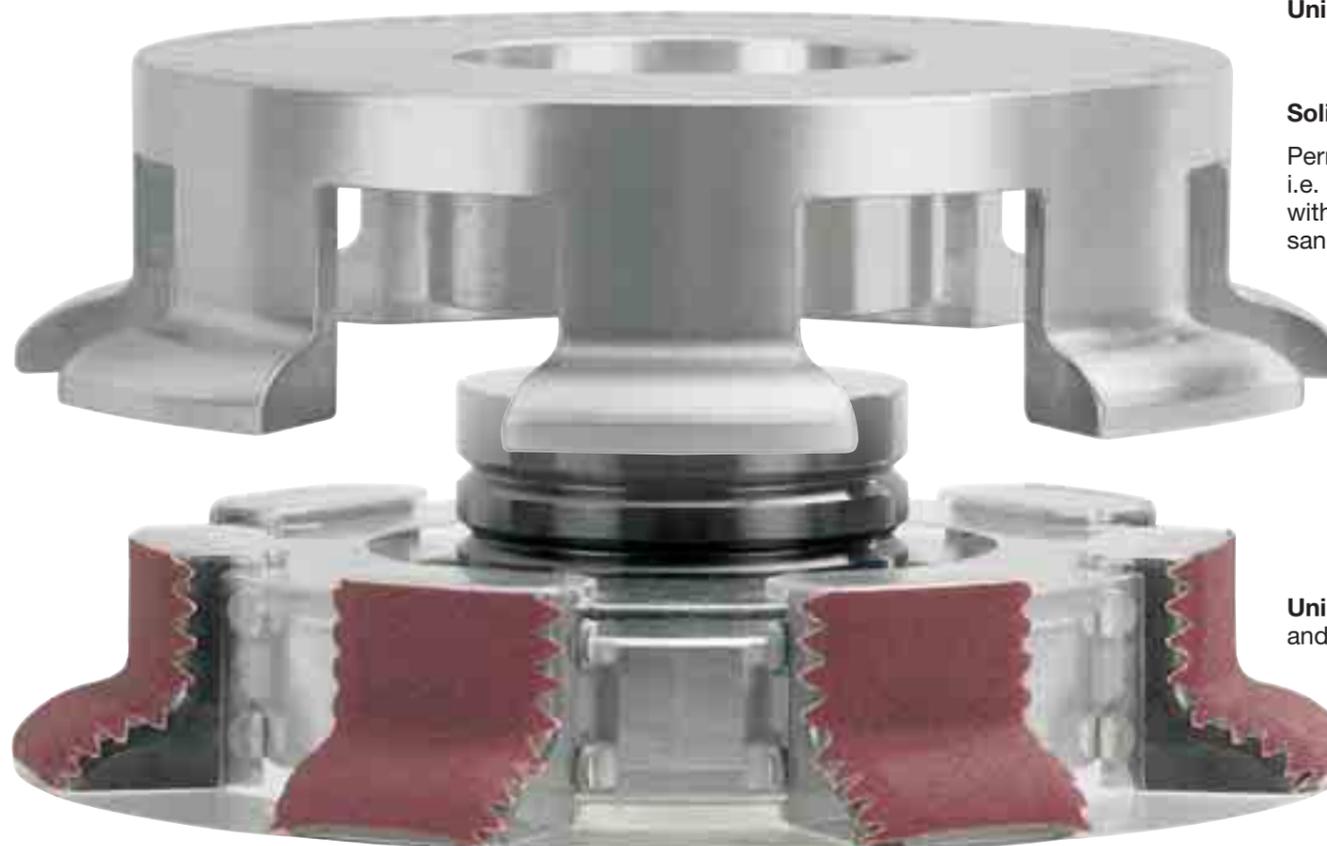

In a variable design for use both as a cost-efficient tool for table-top machines in cabinet shops and – with the relevant equipment – for industrial operation on CNC throughfeed machines and automatic moulders to a high standard of precision and outstanding footage.

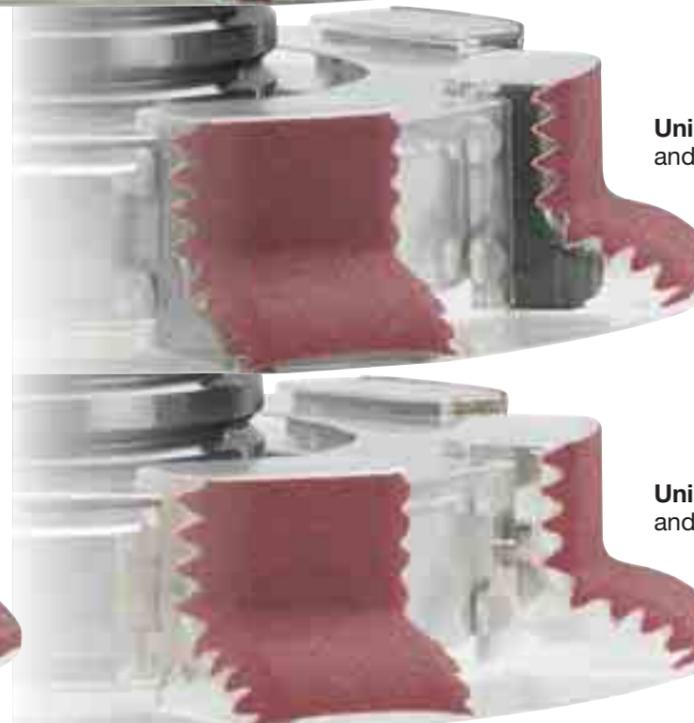

Uni-Line with Solido

**Solido** flank protection

Permits substantially higher footage, i.e. lower abrasive consumption with a level surface finish over long sanding distances.

### 3 x 3 qualities for 3 x 3 cost and performance requirements:

For fitting with individual segments capable of working with three different basic systems:

- B1:** with fully profiled basic profile rubber
- B2:** with Unibase basic profile rubber
- B3:** without basic profile rubber

For fitting with 3 abrasive qualities:

- A1:** Opticover
- A2:** Softblend
- A3:** Easyblend

### Your benefits:

- Sand every conceivable profile with just one tool
- Faster, simpler exchange of profiles
- Minimal resetting times
- Cost savings through combinable standard range
- Variable in diameter and height
- For CNC machines and automatic moulders in throughfeed or cyclical operation
- For high piece numbers and throughfeed lengths
- For minimal batch sizes and only occasional use
- For use as a bore or shank tool
- Abrasive in 3 price categories to address wide-ranging requirements
- Guaranteed constant contour fidelity – no readjustment following abrasive changeover
- Flexible application on wide-ranging different machines
- The perfect solution in terms of price and quality to every requirement
