

Innovation ATEMAG control 4.0

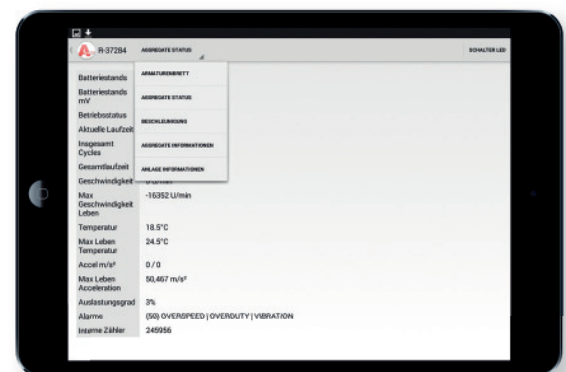

Your Advantages At A Glance:

Increased Aggregate Lifetime With:

- Exactly projectable lubrication and maintenance intervals.
- Perfect preset of operation parameters due to real time vibration control.
- Prevention of tool failure due to tool endurance control.
- Early warning system on overload.

Cost Reduction With:

- Early detection of damages due to the permanent control of significant parameters.
- Working with optimum operation parameters of aggregate and tool.
- Application for mobile devices.
- Low idle times due to accurately projected services.

Aggregatetechnologie und Manufaktur AG

Equipped With Hightech Sensors:

Infrared Sensor

Magnetic Sensor

Stop Watch

Accelerometer

Internal Memory

Control LED
